

### Major Roadway Projects and Studies shown with Rare Species, Floodplains, and Resource Waters

- Bridge Capacity Expansion (Planned)
- Major Intersection Improvement (Programmed)
- ◆ New or Improved Interchange (Programmed)
- ◆ New or Improved Interchange (Planned)
- Study Potential Interchange or Intersection Improvement
- Freeway Capacity Expansion: Flex Lanes (Programmed)
- Freeway Conversion (Programmed)
- Official Map For Potential Freeway Conversion
- Major Arterial Roadway Reconstruction (Programmed)
- Arterial Roadway Capacity Expansion (Programmed)
- Arterial Roadway Capacity Expansion (Planned)
- Reserve ROW Official Map, Manage Access
- Arterial Roadway Capacity Reduction (Programmed or Planned)
- Study Potential Capacity Reduction
- Major Corridor Studies (Recommended)
- Major Corridor Studies (Current)\*
- Potentially On New Alignment
- ~ Listed Impaired Waters 303(d)
- ~ Exceptional Resource Waters
- ~ Outstanding Resource Waters
- MPO Boundary
- Open Water
- 100 Year Floodplain
- Aquatic and/or Terrestrial Rare Species\*\*

\* Improvements Pending EIS and Funding  
 \*\* Rare Species found within the PLSS Section Indicated
