The preparation of this document has been financed in part by funds from the Federal Highway Administration and Federal Transit Administration, U.S. Dept. of Transportation, under the Metropolitan Planning Program, Section 104(f) of Title 23, U.S. Code, and by the Wisconsin Department of Transportation. The contents of this report do not necessarily reflect the official views or policy of the U.S. Dept. of Transportation.

Summary of Transportation Improvement Program Major Anticipated 2025–2029 Projects

Following is a listing of major programmed transportation improvement projects, which are included in the 2025–2029 Transportation Improvement Program (TIP). More detailed project descriptions and information on costs, funding sources, and anticipated timing are included in the full project listings in the report. An asterisk (*) following the project indicates it has programmed Federal transportation funds, requiring MPO approval.

Rideshare and Parking Projects

- Greater Madison MPO Travel Demand Management (TDM) Program*
- State Street Campus-Lake Street Parking Garage and Intercity Bus Terminal

Pedestrian and Bicycle Projects

- Glacial Drumlin Trail (I-39/90 to Buckeye Road)*
- CTH MM Underpass (Approximately 1,500 feet north of Lacy Road)*
- Fitchrona Road Bike Lanes and Path (Lacy Road to Nesbitt Road)
- Fitchrona Road Bike Lanes (North of Whalen to South of Whalen)
- Irish Lane Bike Lanes (Fish Hatchery Road to South of Whalen)
- McKee Road Path (Fish Hatchery Road to Seminole Highway)
- Seminole Highway (Lacy Road to Sub Zero Parkway) & Lacy Road (Wayfair Way to Savannah Oaks MS) Paths
- Syene Road Bike Lanes (McCoy Road to north City Limit)
- S. Syene Road Bike Lanes (E. Cheryl Parkway to W Clayton Street)
- Autumn Ridge Path (Portland Parkway to Ziegler Road) and Bridge over USH 30*
- Badger Rusk Path*
- Bicycle Count Program Visual Bike Counters at Southwest Path at Monroe St and Capital City Path at John Nolen/North Shore *
- Cannonball Trail (Railroad to Bowman Field)
- Capital City Trail (Segments 5 and 6) (Wagon Trail to I-39/90)*
- East-Rusk Shared-Use Path (North Rusk Avenue to Rimrock Road)*
- Hermina Street Bridge over Starkweather Creek
- John Nolen Drive Path (North Shore Drive to Lakeside Street; Lakeside Street to Olin Avenue; Wingra Creek to Beltline)*
- Moorland Road Shared-Use Path (Capital City Trail at Raywood Road to Wayland Dr.)*
- Madison Pedestrian/Bicycle Safety Education and Coordination*
- Madison Safe Routes to School Plan*
- Safe School Crossing Equipment*
- Tancho Drive Path
- Troy Drive RR Bridge
- West Towne Path Phases 2 and 3 (High Point Road to Zor Shrine Place; Zor Shrine Place to Gammon Road)*
- Woodward Drive and Forster Drive Shared-Use Path (Sheridan Drive to Marcy Road; Woodward Drive to Warner Park Path)*
- Nichols Road Path (Winnequah Road to Maywood Road)*
- S. Fourth Street Corridor Path (Milwaukee Street to Isham Street)*
- USH 51 Underpass (Connecting STI Development to west side of USH 51)
- North Loop Trail (Lincoln Avenue to STI Development)
- Jefferson Street Bridge (Pedestrian Bridge Deck Replacement)
- South Loop Trail Extension (Lowell Park to Magnolia Meadows)
- Yahara River Trail Settler's Point Segment (along Yahara River, starting at CTH N/CTH B)
- Yahara River Trail (4th Street to River Park) (4th Street to Water Street)
- N. Bird Street Path and RRFBs (Existing Path to 1,280' S of Egge Road)*
- N. Bird Street Corridor Path and Cycletrack on USH 151 Bridge (STH 19 to USH 151)*
- Patrick Marsh Trail Link (Stone Quarry Road south to existing path along Town Hall Drive)
- Stone Quarry Road Trail (Columbus Street to the Patrick Marsh Wildlife Area)
- Sun Prairie Loop Wayfinding*
- Sun Prairie Safe Routes to School Plan*
- CTH C Multiuse Path Gap (St. Albert the Great Drive through Shonas Highlands Park Woods to existing path within park)

- Military Ridge State Trail (Old CTH PB to USH 18/151), Pave Trail
- Reddan Park Connector Path (Ineichen Drive to Cross Country Road)
- W. Verona Avenue & Westlawn Ave RRFB*
- Bike Path Extension (Southing Grange to CTH N)
- Community Park Path Connection to CTH BB
- CTH BB/Buss Road Path and Intersection Improvement
- CTH BB/CTH N Intersection Improvement
- CTH N / Northlawn Drive Intersection Improvement
- CTH N/North School Road Intersection Improvement
- E. Taylor/Weald Bridge/Main St. (CTH N) Intersection Improvement
- Path Connection through Thaden (East-West Path Connection between Farwell Drive and W. Oak Street)
- Path Connection to McCarthy Park
- Westlawn Drive Bike Improvements (CTH BB to W. Oak Street)
- W. Oak Street Bike Improvements (Westlawn to CTH BB)
- Vilas Road Path Connection to Bakken Park (Progress Drive to Bakken Park Driveway)
- North Street (CTH V) Corridor Path (Stokely Drive to Main Street)*
- Vinburn Road Corridor Path (North Towne Road to Rumley Run)*
- Siggelkow Road Path Extension (Catalina Parkway to CTH AB)
- Oregon Bicycle & Pedestrian Transportation Study*
- Park Street Connector Trail (Perry Parkway to Janesville Street)
- Windsor Road Path (Charlie Grimm Road to CTH CV; Sunset Meadows Drive to N. Town Road)*
- Dane County Safe Routes to Schools (SRTS) Programs*

Transit

City of Fitchburg

- Transit Vehicle Purchase
- Extend Bus Rapid Transit

City of Madison Transportation Capital Projects

- BRT Maintenance Facility
- North-South BRT Planning & Design*
- North-South BRT Construction
- Roadway Improvements, TSP, and Stations [Note: Will seek federal Small Starts grant]

Metro Transit Capital Projects

- New 40-Foot Low-Floor Electric Buses*
- 60-foot Articulated Buses*
- Maintenance Equipment for 60-foot Articulated Buses*
- Remodel, Renovate Existing Bus Maintenance Facility*
- Support Vehicles and Maintenance Equipment
- Facility/Infrastructure Enhancements
- Route Service Planning [Note: Seeking federal route planning/restoration grant]
- Preventive Maintenance and Capital Leasing (tires, etc.)*

Federal Section 5310 Enhanced Mobility for E/D Persons Grants¹

- Madison Paratransit Eligibility Determinations & Mobility Coordinator*
- Dane County Dept. of Human Services – One-Call Center and Mobility Management Program*
- Down Syndrome Association of Wisconsin – Accessible Vehicle Purchase (2)*
- Down Syndrome Association of Wisconsin – Mobility Management*
- Newbridge Madison – Driver Salary & Operations*
- The Hmong Institute – Accessible Vehicle Purchase (1)*

Intercity Rail & Bus Projects

- Jefferson Bus Lines – Intercity Bus Service (Madison to LaCrosse)*
- Lamers – Intercity Bus Service (Madison to Green Bay, Wisconsin Rapids, and Dubuque, IA)*

¹ All projects for which applications were submitted are listed here. Final TIP will list only projects awarded funding.

- State Section 85.20 and Sec. 85.21 Operating Assistance
- Metro Transit
- Dane County E/D Transportation and Group Access Services
- Stoughton Shared Ride Taxi System and Monona Transit System
- Metro Contracted Service Partner Contributions

Streets and Roadways

Madison Metropolitan Planning Area (By Sponsoring Agency)

WisDOT

- W. Beltline PEL & EIS Studies*
- W. Beltline (Terrace Avenue to Gammon Road) Resurfacing*
- Interstate 39/90/94 (USH 12/18 to STH 60) Preliminary Engineering to Environmental Document/EA
- Interstate 39/90/94 (Madison to Portage) USH 151 to 0.55 miles south of CTH V; (0.55 miles S of CTH V to NCL) Resurfacing*
- Interstate 39/90/94 and I-94 (Madison to Portage) I-39/90/94 Collector Distributor Bridges over USH 151 and Interstate 94 EB Bridge over I-39/90: Maintenance and Rehabilitation*
- Interstate 39/90/94, I-39/90, and I-94 Various Bridges: SW Region-Wide Thin Polymer Overlays*
- Interstate 39/90 (CTH BB/Cottage Grove Rd and Hanson Road Bridges) Preventative Maintenance*
- Interstate 39/90 (South Beltline/USH 12/18 to STH 30) Concrete Pavement Repair*
- Interstate 39/90 (Lien Road to USH 51) Resurfacing*
- Interstate 94 (CTH N to Airport Road) Resurfacing*
- USH 14 (Fitchburg North City Limit to South City Limit) Mill and Overlay*
- USH 18/151 (CTH G to STH 69) Ramp/Auxiliary Lane and Bridge Widening*
- USH 51/Stoughton Road (Terminal Drive to STH 30) Preliminary Planning Pre-NEPA
- USH 51/Stoughton Road (STH 30 to STH 19) Preliminary Engineering through Environmental Document
- USH 51 (Interstate 39/90 to Spring Road; Spring Road to 5th Street; 5th Street to Harrison Street; Harrison Street to Jackson Street; Roby Road to Exchange Street; Exchange Street to Larson Beach Road; Larson Beach Road to Voges Road) Reconstruction*
- USH 51 (Jackson Street to Roby Road) Expand Roadway to Four Lanes*
- USH 151/Park Street (Park Street WSOR Crossing to Olin Avenue) Pavement Replacement*
- USH 151 (Madison to Sun Prairie) (I-39/90/94 to Main Street) Resurfacing*
- STH 19 (Westmount Drive Intersection) Reconstruct Intersection with Roundabout*
- STH 19 (Windsor Street & Bristol Street) (North Street to Main Street) Mill & Overlay*
- STH 19 (Division Street to River Road) Resurfacing*
- STH 19 (Wood Violet Lane to Maunsha River Bridge) Resurfacing*
- STH 19 (USH 151 Interchange) Safety Improvements*
- STH 113 (Sunset Lane to CTH V) Pavement Replacement*
- STH 138 (STH 59 to Milwaukee Street) Replace Pavement*
- CTH AB/Buckeye Road (City of Madison) WSOR Railroad Crossing/Signal Work*
- Southwest Region Pavement Marking (USH 12/14/18/151 (USH 14 to I-39/90/94) and USH 151 (CTH N to E. County Line)*)

Dane County

- CTH AB (CTH MN to USH 12) Resurfacing
- CTH BB Koshkonong Creek Bridge Reconstruction*
- CTH BW/West Broadway (Bridge Road to Stoughton Road) Resurfacing
- CTH CC/Jefferson Street (West Village Limits to CTH D) Resurfacing
- CTH CV/Lake Road (STH 19 to Vinburn Road) Reconstruction
- CTH M/Century Avenue (Parmenter Street to West Point Road) Resurfacing
- CTH M (East of Branch Street Intersection) Bridge Replacement over Pheasant Branch Creek*
- CTH MM/Wolfe Street (Janesville Street to South Village Limits) Resurfacing
- CTH MM/Rimrock Road (John Nolen Drive to USH 12/18; USH 12/18 to McCoy Road) Pavement Replacement w/ bike facilities*
- CTH MN Door Creek Bridge (Reconstruction)*
- CTH N Little Door Creek Bridge (Reconstruction)*
- CTH N Koshkonong Creek Bridge (Reconstruction)*
- CTH N (Progress Way to North County Line)

City of Fitchburg

- Anton Drive & Fitchrona Road (Anton Drive/King James Way Intersection) Construct Roundabout and sidewalk along the east side of Anton Drive, on both sides of King James Way, and on the north side of McKee Road. Add bike path on Fitchrona Rd, on the north and west sides of the Wingra Property.
- Fish Hatchery Road (Sparkle Stone Crescent to 450' S. of Byrneland Street) Reconstruction, Widen to 4-Lane Roadway
- Fitchrona Road (Lacy Road to Nesbitt Road) Reconstruction to Urban Cross Section w/Bike Lanes and Multi-Use Path
- Fitchrona Road (680' north of Whalen Road to 2,650' south of Whalen Road) Resurfacing w/Bike Lanes
- Haight Farm Road (Lacy Road to USH 14) Reconstruction to Urban Cross Section
- Irish Lane (CTH D to S. Syene Road) Reconditioning w/ Buffered Bike Lanes
- Lacy Road and Seminole Highway (Seminole Highway: Lacy Road to Schumann Drive; Lacy Road: Seminole Highway to east of Savannah Oaks Middle school) Installation of Multi-use Path and Sidewalk
- S. Syene Road (Nannyberry Park to W. Clayton Rd.) Reconstruction to Urban Cross Section W/ Bike Lanes
- S. Syene Road (W. Clayton Road to McCoy Road) Reconstruction and Reconfiguration of S. Syene Road/McCoy Road intersection*

City of Madison

- Gammon Road/Watts Road -- Intersection Improvements*
- John Nolen Drive (Lakeside Street to North Shore Drive) Reconstruction and Widen Path*
- John Nolen Drive (Lakeside Street to Olin Avenue) Reconstruction and Ped/Bike Improvements*
- John Nolen Drive/Olin Avenue (Wingra Creek to Beltline) Reconstruction w/ Path*
- High Point Road – Construct Roadway on New Alignment*
- Mineral Point Road (Beltline Highway to S. High Point Road) Pavement Replacement w/ Path*
- Mineral Point Road/South High Point Road – Reconstruct Intersection*
- Regent Street (Randall Avenue to Park Street) Reconstruction
- E. Wilson Street and E. Doty Street (Martin Luther King Jr. Boulevard. to S. Franklin Street) Reconstruction w/ two-way Cycle Track
- S. Whitney Way (Odana Road Intersection) Intersection Improvements*

City of Middleton

- Spring Hill Drive (Lynn Street to Algonquin Drive) Resurfacing
- N. Westfield Road (Parmenter Street to S. City Limits) Resurfacing

City of Monona

- Nichols Road (Winnequah Road to Maywood Road) Resurfacing and Partial Reconstruction w/ Path*
- Tecumseh Avenue Lagoon Du Nord Bridge Replacement*

City of Stoughton

- S. Fourth Street (Milwaukee Street to Isham Street) Reconstruction w/ Path*
- Lincoln Avenue (CTH B to Kriedeman Drive) and Kriedeman Drive (Lincoln Avenue to Page Street)
- Nygaard Street (Jackson to Buckingham) Resurfacing
- Racetrack Road (USH 51 to CTH A) Reconstruction
- E. South Street (Dunkirk Avenue to S. Academy Street) Reconstruction
- Wilson Street (Van Buren Street to Lincoln Avenue) Resurfacing

City of Sun Prairie

- N. Bird Street (STH 19/Windsor Street to USH 151) Pavement Rehabilitation with Cycle Track and Path*
- Broadway Drive (St. Albert the Great Drive to Stonehaven Drive) Pavement Rehabilitation
- Clarmar Drive – Extend to Bailey Road
- Linnerud Drive (S. Walker Way to S. Bird Street) Pavement Rehabilitation
- E. Main Street (Bristol Street to Church Street; Dewey Street to Wood Violet Lane) Pavement Replacement
- Main Street (Walker Way, Bird Street, Linnerud Drive) Intersections – Intersection Improvements*
- O'Keefe Avenue (Reiner Road to Summerfield Way) Resurfacing, Reduce Lanes, add Bike Lanes*
- O'Keefe Avenue (McCoy Road/Sunfeld St. Intersection) Intersection Improvements*
- Rattman Road (Hoepker Road to W. Main Street) Reconstruction and Widening to 4-Lane Divided Roadway w/ Bike Lanes
- St. Albert The Great Drive (Broadway Drive to Bird Street) Resurfacing w/Bike Lanes*
- N. Thompson Road (W. Main Street to St. Albert the Great Drive) and St. Albert the Great Drive (CTH C to N. Thompson

Road) Resurfacing, Partial Reconstruction w/Bike Lanes & Partial Path Segment*

City of Verona

- West Verona Avenue (Legion Street Intersection) Intersection and Signal Improvements *
- West Road (Country View Road to Ridge Road) Construct Two-Lane New Road with Bridge crossing over the Sugar River and Military Ridge State Trail.
- Country View Road (CTH PD to Future West Road) Construct Two-Lane Roadway on New Alignment.

Village of Cottage Grove

- Cottage Grove Road/CTH BB(CTH N to East Village Limits) Reconstruction to Urban Cross Section

Village of DeForest

- Acker Parkway (Seminole Way to CTH CV) Reconstruction
- CTH CV/N. Main St. (Commerce Street to CTH V) Resurfacing
- CTH V/E. North Street (CTH CV to Nelson Court) Reconstruction
- CTH V/E. North Street (Stevenson Street to N. Halsor Street) Resurfacing
- E. Holum Street (Railroad to N. Town Road) Reconstruction*
- W. Lexington Parkway (Eagle Nest Lane to River Road)
- South Street (Hill Street to S. Main Street; Riverwood Bend to Mayapple Circle) Resurfacing
- Vinburn Road (N. Towne Road Intersection) Intersection Improvements*
- Vinburn Road (Main Street to North Towne Road) Reconstruction to Urban Cross Section w/Path*

Village of McFarland

- CTH MN/Broadhead Street (N. Peninsula Way to CTH AB) Reconstruction w/Bike Lanes
- Creamery Road & Elvehjem Road (Milwaukee Street to CTH AB) Reconstruction
- Siggelkow Road (Catalina Parkway to CTH AB) Reconstruction to Urban Cross Section w/Path

Village of Oregon

- N. Burr Oak Avenue (Netherwood Road to Jefferson Street) Reconditioning
- E. Lincoln Street (N. Main Street to N. Perry Parkway) Reconstruction*
- S. Main Street (State St to S Perry Pkwy) Reconstruction
- N. Oak Street (East Lincoln Street to Brook Street; Netherwood Road to E. Lincoln Street) Reconstruction

Village of Waunakee

- S. Division Street (Knightsbridge to Main Street) Pavement Replacement
- N. Madison Street (Cross Street to Easy Street) Pavement Rehabilitation
- Uniek Road (Moravian Valley Rd. to Raemisch Rd.) and Raemisch Rd. (Uniek Rd. to Frank H St.) Pavement Rehabilitation

Village of Windsor

- Vinburn Road (Portage Road to North Towne Road) Resurfacing
- Windsor Road (Charlie Grimm Road to CTH CV) Reconstruction to Urban Cross Section w/ Path*

Town of Burke

- Daentl Road -- Token Creek Bridge Replacement*
- Hoepker Road (CTH CV to USH 51) Pavement Replacement

Town of Middleton

- Pioneer Road (Old Sauk Way to Valley View Road) Reconditioning

Town of Sun Prairie

- Bailey Road (Forward Drive to Grove Street/CTH N) Reconstruction with Paved Shoulders*

Outer County Area (Information Purposes Only)

Pedestrian and Bicycle Projects

Dane County:

- Great Sauk/Walking Iron Trail Bridge over Wisconsin River*

Village of Belleville:

- Belleville Schools Safe Route Path Study*

Streets and Roadways

WisDOT

- Interstate 94 (CTH N to Airport Road) Resurfacing*
- USH 51 (I-39/90 to Spring Road) Reconstruction with Intersection Improvements*
- USH 51 (DeForest to Portage) (1 Mile North of CTH V to STH 22) Mill and Overlay*
- STH 19 (Wood Violet Lane to Maunasha River Bridge) Resurfacing*
- STH 113 (CTH V to CTH P) Pavement Replacement*

Dane County

- CTH A (Koshkonong Creek Bridge) Reconstruct Bridge*
- CTH A (Saunders Creek Bridge) Reconstruct Bridge*
- CTH A (CTH G to STH 92) Resurfacing
- CTH BB (Koshkonong Creek Bridge) Reconstruction*
- CTH G (Mt. Vernon Cr. Bridge) Reconstruct Bridge*
- CTH G (W. Br. Sugar River Bridge) Reconstruct Bridges*
- CTH JJ (Vermont Creek Bridge) Reconstruct Bridge*
- CTH N (Little Door Creek Bridge) Reconstruct Bridge
- CTH P (CTH PD to CTH S) Resurfacing
- CTH PQ (Koshkonong Creek Bridge) Reconstruction*
- CTH TT (Maunasha River Bridge) Reconstruction*
- CTH V (Snowy Owl to CTH VV North) Resurfacing*
- CTH Y (Black Earth Creek Cr Bridge) Reconstruction*

Town of Rutland

- Lake Kegonsa Road (0.2 miles south of CTH A) – Replace Bridge over Badfish Creek*

Introduction

This document presents an updated listing of short-range transportation improvement projects anticipated to be undertaken in the period from 2025 through 2029 in the Madison Metropolitan Area & Dane County. Inclusion in this coordinated program is required to make projects eligible to receive Federal funding assistance in the Madison Metropolitan Planning Area. Outer area projects are separately listed for informational purposes.

This transportation improvement program is part of an annual effort to specify a coordinated, multi-modal transportation program that includes the full range of transportation improvements to be considered for implementation during the next five-year period. This annual updating of projects allows for adjustments in the relative priorities of transportation improvements and provides an up-to-date indication of needed area-wide improvements.

This coordinated listing has been prepared as a cooperative staff effort by state and local implementing agencies and the staff of the Greater Madison MPO (Metropolitan Planning Organization) and is primarily based upon state and local capital improvement programs and budgets. Implementing agencies have submitted their listings of proposed projects to MPO staff to coordinate into a comprehensive listing of proposed major transportation improvements, with indications of scope, cost, funding, and timing. This listing is subject to review by the MPO Technical Coordinating Committee, MPO Policy Board, and local units of government. The MPO strongly encourages public participation in the development of all projects, including those for which Federal funding is being sought. The MPO also provides several opportunities for public involvement, including a public hearing, in the development of the Transportation Improvement Program (TIP) for the region.* Following refinements and action by the MPO Policy Board, this document is submitted to appropriate state and Federal agencies as an indication of transportation improvement projects anticipated to be undertaken in this area, particularly for years 2025, 2026, 2027, and 2028. By annually pursuing this procedure, an up-to-date program of transportation projects is ensured.

Project listings for years 2025 through 2028 are of particular importance in this program, since necessary funding has been, or is expected to be, sought to implement these projects. These first four-year listings are further intended to meet the rules and requirements of the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) as they relate to the Madison Metropolitan Planning Area. These rules generally indicate that projects must be included among the listings of projects to be considered by the Federal agencies for possible funding. FHWA and FTA consider projects in the fifth year as informational.

All projects may not be able to proceed as scheduled due to: change in state or local budgets; delay in project development activities, such as real estate acquisition or environmental review; delay in planned land use development; changes in implementation priorities; and/or other factors that may be unknown at this time. Project implementation timing is planned for many of the projects to coincide with: major land use developments; scheduled major transit service improvements; utility work; and/or the availability of local, state, and Federal funding. The project listings include an indication of the anticipated source of funding for projects.

The program schedule is based on the project schedule date. Obligation of Federal funds typically occurs six weeks prior to the scheduled let date. In those cases where funding will be obligated in the fall, but the project will not be constructed until the following calendar year, funds are shown in the project listings in the year of obligation with a note regarding the year of construction. The project maps show the year of construction.

The tables on pages 13 through 56 present the transportation improvement projects through 2029 in separate listings for the Madison Metropolitan Planning Area and the Outer Area. In each listing, activities are categorized as follows:

- | | |
|--------------------------------|---------------------------|
| 1) Rideshare/TDM | 4) Transit Capital Grants |
| 2) Parking Facilities | 5) Transit Operating |
| 3) Pedestrian/Bicycle Projects | 6) Streets and Roadways |

**The MPO's public involvement process associated with development of the TIP is used by the City of Madison (Metro Transit) to satisfy the public participation requirements for development of the Program of Projects required under the Federal Transit Administration's Section 5307 Urbanized Area Formula Program. The Wisconsin Dept. of Transportation (WisDOT) relies on the public involvement process conducted by the MPO in the development of their STIP, to satisfy the Federal Transit Administration program and planning requirements, as established for Section 5307 and 5309 programs.*

Shading of the project description indicates those projects programmed with Federal funds. State and locally funded projects and those planned, but without programmed funding, are included for information and coordination purposes. Projects are listed by primary project sponsor in each category, such as state, county, or local municipality. The projects included have been drawn from adopted area-wide plans and programs including:

- 1) *Connect Greater Madison: 2050 Regional Transportation Plan (RTP)* (adopted by the MPO in May 2022);
- 2) *2013-2017 Transit Development Plan for the Madison Urban Area* (adopted by the MPO in April 2013; update underway);
- 3) *Bicycle Transportation Plan for Madison Metropolitan Area & Dane County* (adopted by the MPO in September 2015);
- 4) *2016 Regional Intelligent Transportation Systems (ITS) Strategic Plan for the Madison Metropolitan Area* (adopted by the MPO in January 2016);
- 5) *2019-2023 Coordinated Public Transit – Human Services Transportation Plan for Dane County* (adopted by the MPO in June 2019); and
- 6) Other ongoing area/corridor transportation plans and studies.

Funding by Transportation Mode and Project Type

The following charts show the percentage of total programmed funding in Dane County by transportation mode (i.e., Roadways, Transit, Ped/Bike, Other) and roadway project type (i.e., Maintenance/Preservation, Capacity Expansion, Safety/TSM). Programmed funding includes federal, state, and local funding for 2025-2029.

CHART: 2025-2029 Transportation Improvement Program for the Dane County Area-Percentage of Programmed Funding by Mode (TO BE ADDED IN FINAL TIP)

**CHART: 2025-2029 Transportation Improvement Program for the Dane County Area-Percentage of Programmed Streets/
Roadway Funding by Project Type (TO BE ADDED IN FINAL TIP)**

Federal Transportation Programs

The Federal Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) ushered in landmark changes in Federal policy and established a variety of new programs for funding transportation improvements. Subsequent reauthorization bills have maintained the basic structure of Federal programs established in ISTEA for funding transportation improvements. The Moving Ahead for Progress in the 21st Century (MAP-21) bill, adopted in July 2012, built on and refined many of the programs and policies established in 1991. MAP-21 restructured the core highway and transit formula programs, consolidating some of the previous programs. Eligibility of the programs authorized under the prior bill, SAFETEA-LU, was retained within the condensed structure of the MAP-21 funding programs. The Fixing America’s Surface Transportation (FAST) Act, adopted in December 2015, built upon the program structure of MAP-21. The Infrastructure Investment & Jobs Act (IIJA), also known as the Bipartisan Infrastructure Law (BIL), adopted in November 2021, added a number of new formula and discretionary programs and significantly increased funding for existing programs. The tables below describe the major applicable Federal highway and transit programs under the IIJA.

Major Federal-aid Highway Programs under the IIJA, aka BIL

Program	Description
National Highway Performance Program (NHPP)	Formula program that funds projects to construct new facilities on or improve the condition and performance of the National Highway System (NHS)
Surface Transportation Block Grant Program (STBG), including TA Set Aside	Formula program that provides flexible funding for wide range of eligible projects and programs to address state and local transportation needs; suballocation of funding to MPOs; also set-aside for Transportation Alternatives (TA) Program for which MPOs also receive a suballocation of funding which funds primarily bicycle/pedestrian projects
Carbon Reduction Program	New formula program under the IIJA that provides funds for projects designed to reduce transportation emissions, defined as CO2 emissions from on-road highway source; suballocation of funding to MPOs
Highway Safety Improvement Program (HSIP)	Formula program that funds projects to reduce traffic fatalities and serious injuries on public roads; set aside for Railway-Highway Crossings Program
National Highway Freight Program	Formula program that funds construction, operational improvements, freight planning, and performance measures
Bridge Program	New formula program that provides funds to replace, rehabilitate, preserve, and construct highway bridges. There is no suballocation of funding to MPOs. Sets aside 15% of each State’s apportionment for “off-system” bridges (i.e., not on federal aid highways).

Promoting Resilient Operations for Transformative, Efficient and Cost Saving Transportation (PRTOECT) Program	New program under the IIJA that includes both formula funding distributed to State and competitive grants. Purpose is to make the transportation system more resilient to natural hazards, including climate change, flooding, extreme weather events, etc. through support of planning activities, resilience improvements, and evacuation routes. There is not a suballocation to MPOs.
National Electric Vehicle Infrastructure Program (NEVI)	New formula program that provides funding to States to strategically deploy electric vehicle (EV) charging infrastructure and to establish an interconnected network to facilitate data collection, access, and reliability.
Safe Streets and Roads for All (SS4A) Program	New discretionary program under the IIJA, which supports local initiatives to prevent death and serious injuries on streets, commonly referred to as “Vision Zero.” Funds safety action plans and implementation projects identified in a safety plan.
Reconnecting Communities Pilot Program	New pilot discretionary program under the IIJA, which supports planning and infrastructure projects designed to restore community connectivity through the removal, retrofit, mitigation, or replacement of eligible transportation facilities.
Rebuilding American Infrastructure with Sustainability and Equity	New discretionary program under the IIJA, which provides grants for infrastructure projects that will have a significant local or regional impact, making the system safer and more accessible, affordable, and sustainable.

Major Federal-aid Transit Programs under the IIJA, aka BIL

Program	Description
Urbanized Area Formula Grants (5307)	Provides funding to public transit systems in large urban areas for capital, planning, job access projects, and some qualified operating expenses such as ADA paratransit and preventive maintenance
Capital Investment Grants (5309)	Discretionary program for funding fixed guideway investment projects such as bus rapid transit (BRT), light rail, and streetcars
Enhanced Mobility of Seniors and Individuals with Disabilities (5310)	Program to assist local transit agencies, governments, and nonprofit groups in meeting needs of elderly and persons with disabilities; sub allocation of funding to large MPOs
Rural Area Formula Grants (5311)	Provides funding for capital, planning and operating assistance to support public transportation in small urban and rural areas under 50,000 in population
State of Good Repair Formula Program (5337)	Provides capital assistance for maintenance, replacement, and rehabilitation of existing fixed guideway (e.g., rail lines, bus lanes) facilities to maintain state of good repair
Bus and Bus Facilities Formula Program (5339a)	Provides funding to transit agencies and states to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities
Bus and Bus Facilities Discretionary Grants (5339b)	Discretionary component of the program to fund the same bus and bus facility improvements; includes Low or No Emissions Bus Program

Project Selection for Federal and State Transportation Funding

Federal and state transportation funding have specific project eligibility and other requirements. For instance, funding may be limited to a specific transportation mode, type of project, or geographic area. Many of the programs may only be used for capital projects and not for operating expenses. In some cases, Federal law allows the transfer or flexing of FHWA funds, such as Surface Transportation Block Grant (STBG) or National Highway Performance Program (NHPP), to fund transit capital projects. The MPO has in the past flexed some of its STBG – Urban funds to FTA funds to purchase buses for Metro Transit and vans for YWCA’s JobRide program.

The amount of Federal funding available for state and local transportation projects is determined by Federal authorization bills, annual Federal appropriations bills, and, along with state funding, is established in the state biennial budget. The biennial budget is prescriptive with regard to Federal and state funding available for different types of transportation projects. The process for selection of projects for use of Federal and state funding and inclusion in the TIP and the MPO’s role in that process varies depending upon funding source. The vast majority of Federal highway funding and all state funding is programmed by the WisDOT. The vast majority of Federal transit funding coming to the Madison urban area is programmed by Metro Transit, which is the designated recipient of this funding. The primary role of the MPO is to ensure that in the case of Federally funded and regionally significant projects that they are consistent with the MPO’s long-range regional transportation plan (RTP), including modal and strategic plans that have been incorporated into the RTP. However, as discussed below, as a

large MPO with an urbanized area population over 200,000, the Greater Madison MPO receives a sub-allocation of funding under three Federal aid highway programs: STBG – Urban; STBG Program – Transportation Alternatives Set Aside; and the new Carbon Reduction Program. The MPO solicits applications, evaluates applications using adopted scoring criteria, and prioritizes projects for funding under these three programs. The MPO also receives a sub-allocation of funding under the Section 5310 transit program. Metro Transit is the designated recipient of those funds as with other FTA funding, but the MPO prepares the Section 5310 program management plan and prioritizes projects for funding.

For state projects, WisDOT provides the MPO with a listing of projects proposed for inclusion in the TIP with use of Federal and state funding, including Federal NHPP funding and STBG funding available to projects statewide. The process for selecting state highway projects varies depending upon the size and complexity of the projects. Most state highway rehabilitation and reconstruction projects are funded under Federal NHPP and/or the State Highway Rehabilitation (SHR) program. WisDOT SW Region staff select projects based on roadway condition, crash rates, traffic congestion, and public input. Large projects, particularly those involving a major capacity expansion, are generally funded under the State Majors Program. Projects in the SW Region compete with other projects statewide under this program. Majors projects and studies are selected for enumeration in the state biennial budget by the state's Transportation Projects Commission based on criteria developed by the commission.

For local projects, WisDOT solicits projects for most FHWA funding programs and some FTA programs. The solicitations typically occur biennially in conjunction with the biennial budget process. WisDOT evaluates and recommends local projects for Bridge and Highway Safety Improvement Program (HSIP) funding. For transit projects, WisDOT distributes FTA Section 5311 Non-Urbanized Area Formula Grant funding to urban transit systems outside urbanized areas and for some intercity bus services. WisDOT also solicits projects for FTA Section 5310 program funding located outside urbanized areas. WisDOT also distributes state transit operating funding to urban transit systems through the Section 85.20 program and to counties for specialized transportation under the Section 85.21 program. As noted above, the MPO selects projects in the Madison urban area for funding under the STBG – Urban and STBG Transportation Alternatives Set Aside programs, Carbon Reduction program, and the Section 5310 program, while Metro programs projects with other FTA funding for the Madison area in cooperation with the MPO.

Selection Process for Federal Funding Sources Available to Local Transit and Highway Projects

The following sections provide summaries of processes used to select local projects for primary FTA and FHWA funding sources.

FTA Section 5307 Urbanized Area Formula Funding. FTA Section 5307 funding is available for transit operators within urbanized areas to fund transit capital, or capitalized maintenance, projects. FTA announces annually the amount of FTA Section 5307 funding that will be allocated to urbanized areas having a population of 200,000 or more, including the Madison urbanized area. Metro Transit is the designated recipient of this funding and responsible for selection of projects in cooperation with the MPO. The MPO has worked with Metro in the past to distribute some funding to municipalities that are not part of the Metro service area, such as Stoughton and Sun Prairie (now in the service area). Projects selected by Metro Transit are provided to the MPO for review and approval and the MPO also solicits input on the projects from local transit providers and others on behalf of Metro.

FTA Section 5337 State of Good Repair Funding. FTA announces annually the amount of FTA Section 5337 funding to assist transit operators in maintaining their fixed-guideway transit systems (rail or bus on dedicated lane). The State of Good Repair Grants Program (49 U.S.C. 5337) provides capital assistance for maintenance, replacement, and rehabilitation projects of high-intensity fixed guideway and bus systems to help transit agencies maintain assets in a state of good repair. Additionally, SGR grants are eligible for developing and implementing Transit Asset Management plans. Metro Transit is the recipient of FTA Section 5337 funds.

FTA Section 5339 Bus and Bus Facilities Program Funding. FTA announces annually the amount of FTA Section 5339 funding available to capital bus and bus facilities projects statewide and to urbanized areas with populations of 200,000 or more, such as Madison. The program provides funding for capital projects to replace, rehabilitate and purchase buses, vans, and related equipment, and to construct bus-related facilities, including technological changes or innovations to modify low or no emission vehicles or facilities. Metro Transit is the recipient of FTA Section 5337 funds that are distributed by formula. Metro has also applied in the past for discretionary funds under that part of this program, including the subprogram for purchase of low or no emission vehicles.

FTA Section 5310 Enhanced Mobility of Seniors and Individuals with Disabilities Program Funding. The purpose of the Section 5310 Enhanced Mobility of Seniors and Individuals with Disabilities Program is to enhance mobility for seniors and persons with disabilities by providing funds for projects or programs to serve the special needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit services. FTA announces annually the amount of FTA Section 5310 funding available to urbanized areas with populations of 200,000 or more, such as Madison, and statewide. Since the enactment of MAP-21 in 2012, FTA Section 5310 program has required the designation of at least one recipient in large urbanized areas and a determination of a method for distributing the funding. In 2015, Metro Transit was named the designated recipient for Section 5310 funding allocated to the Madison urbanized area. Metro is the designated recipient for other FTA funds and has the legal, financial, and staffing capabilities to receive and administer federal funds. As the designated recipient, Metro Transit is responsible for administering grant agreements, applying for federal funds, and satisfying documentation and reporting requirements. However, the MPO selects the projects for funding. WisDOT solicits, evaluates, and recommends projects separately for 5310 funding available to projects in areas outside of the large urbanized areas.

FHWA Surface Transportation Block Grant Program – Madison Urbanized Area (STBG – Urban) Funding. Starting with the 2016-2020 program cycle, the MPO has solicited projects biennially for FHWA STBG-Urban funding. The STBG (formerly STP) provides flexible funding that may be used for projects to preserve and improve the conditions and performance on any Federal-aid roadway (i.e., classified as an arterial or collector), for bridge projects on any public road, for pedestrian and bicycle infrastructure or programs, and for transit capital projects. Eligible recipients are Dane County and local units of government. As a large MPO, the Greater Madison MPO receives a sub-allocation of funding under the program, referred to as STBG – Urban, and selects the projects for funding. The MPO’s annual allocation of funding had been \$6.86 million per year, but was increased to \$8.99 million under the IIJA. The MPO’s estimated annual allocation in 2025-2029 is \$10.319 million. The map on page 8 shows the approved 2020 Census urban area boundary for the Madison urban area within which STBG – Urban funds can be spent per MPO policy. The MPO adopted the 2020 Census urban area boundary in February 2024.

The MPO approved revised STBG – Urban program policies and project screening and scoring criteria for evaluating project applications in 2023. The scoring criteria utilize the following seven categories: (1) importance to the regional transportation system and supports regional development framework; (2) system preservation; (3) congestion mitigation/TSM; (4) safety enhancement; (5) enhancement of multi-modal options; (6) environment; and (7) equity. The STBG – Urban Project Selection Process document, which outlines the process, policies, and project scoring criteria is included as Attachment A of the TIP. It also provides an overview of the program. The table on page 8 lists the approved and new priority projects for 2025-2029 for use of STBG – Urban funds.

FHWA STBG Transportation Alternatives Set Aside Program Funding. The Moving Ahead for Progress in the 21st Century Act (MAP-21) established the Transportation Alternatives Program (TAP or TA), which replaced the funding from some previously separate federal programs, including Transportation Enhancements (TE), Safe Routes to Schools (SRTS), and Recreational Trails, consolidating them into a single funding source. As a result, WisDOT incorporated its previously separate SRTS, TE, and state funded Bicycle & Pedestrian Facilities Program (BFPF) into one program and application process. The Fixing America’s Surface Transportation (FAST) Act, adopted in December 2015, restructured some of the federal programs, replacing TAP with a set-aside of STBG program funding for Transportation Alternatives (TA). The IIJA maintained the same program structure.

WisDOT solicits and selects projects for TA funding available statewide. Project solicitation is typically conducted biennially. In addition, over one-half of the available statewide TA funding is allocated directly to MPOs such as the Greater Madison MPO. The MPO selects projects for funding with that allocation. The MPO updated its TAP program policies and project scoring criteria in 2021. The Madison area received a sub-allocation of \$617,000 for the 2022-2026 program cycle, but this was increased to \$1.24 million under the IIJA. The MPO’s estimated annual allocation in 2025-2029 is \$1.373 million. The MPO approved projects for use of its “base” TAP funding and the supplemental FY 2022 funding under the IIJA. A solicitation was issued for projects using the MPO’s supplemental FY 2023-2028 funding in June 2023.

The eligible project categories under the TA program per federal law and MPO policy are:

- Provision of on- and off-street facilities for pedestrians and bicycles;
- Provision of infrastructure and systems that provide safe routes for non-drivers;
- Conversion and use of abandoned rail corridors for trails; and
- Safe routes to school program activities.

FHWA Bridge Funding. Since the adoption of MAP-21 in 2012, bridge projects on the National Highway System are funded under the National Highway Performance Program and bridge projects not on the National Highway System are funded under the STBG Program (formerly STP), rather than a separately funded bridge program. However, the state biennial budget

continues to allocate a portion of the Federal funding that the state receives for local bridge projects. WisDOT typically solicits biennially for local bridge projects. WisDOT evaluates and recommends projects for FHWA funding based on procedures specified in Wisconsin Administrative Code Trans 213.01 (04). As part of these procedures, WisDOT rates and ranks projects based on a system whereby each county is credited bridge funds available in the respective funding cycle based on their relative need represented by their proportional share of the total estimated replacement cost of eligible bridges (sufficiency ratings of less than 50) identified throughout the state. These need-based credits are accumulated with debits occurring from each county's balance as projects are selected for implementation. Each candidate project is rated and prioritized under the evaluation and selection process based on each governmental unit's credit balance and the estimated project cost in the order of the priorities indicated by each county. WisDOT provides a listing of the projects within Dane County recommended for FHWA Bridge Replacement funding to the MPO review and consideration for inclusion in the TIP. As noted above, the IJJA created a new Bridge program as well now.

FHWA Highway Safety Improvement Program (HSIP) Funding. WisDOT solicits projects two times a year for FHWA HSIP funding available to local projects statewide. WisDOT is responsible for evaluating and recommending local projects, as well as state projects, for FHWA HSIP funding. WisDOT provides a listing of the local and state safety projects in Dane County recommended for FHWA HSIP funding for review and consideration of inclusion in the TIP.

List of Obligated Projects

Each year, MPO staff, in coordination with staffs from WisDOT, FHWA, FTA, and Metro Transit, prepares a listing of projects that were obligated for FHWA or FTA funding during the previous calendar year. The obligation of funds for a project by the appropriate Federal agency – FHWA or FTA – indicates the Federal government's commitment to fund the approved Federal share of the cost of a project. The listing of obligated projects is completed within the first three months of the year and made available to the public on the TIP webpage of the MPO's website. It should be noted that projects for which funds have been obligated are not necessarily initiated or completed in the four program years of the TIP, though in most cases the projects are completed.

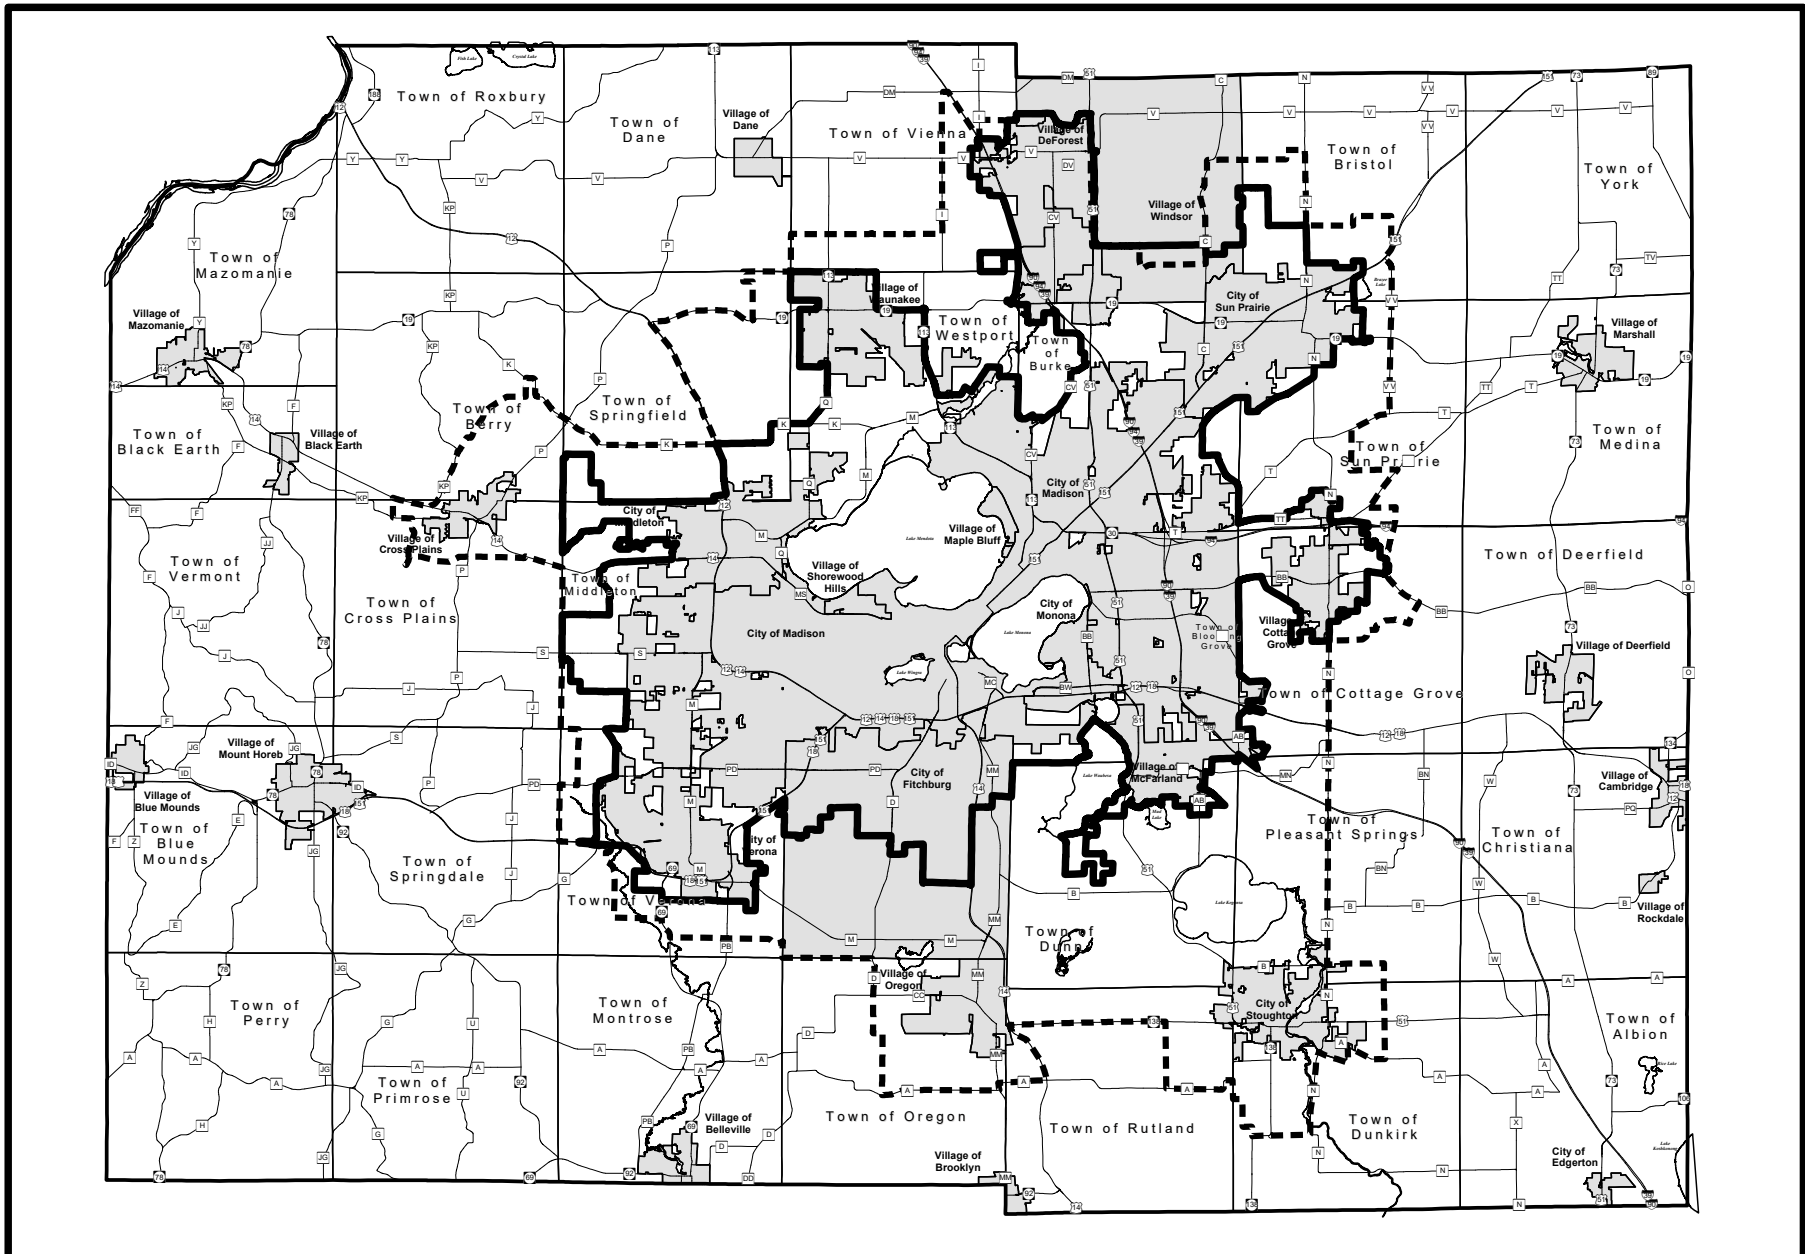

TIP Amendment Process

Following approval of the annual TIP update by the MPO and WisDOT for incorporation into the state TIP, changes to projects listed in the TIP and the addition or deletion of projects in the TIP are requested periodically by project sponsors. Amendments to the TIP are used for adding projects to, or removing projects from, the TIP and for changes to projects already listed in the TIP that would substantially modify project cost, scope, or timing. Attachment G provides information on the MPO's TIP amendment procedures.

Expedited Project Selection Procedures

The MPO, WisDOT, and Metro Transit have agreed to the following procedures to be used in advancing projects from the approved TIP for federal funding commitment:

1. The first year of the TIP constitutes an agreed-to list of projects for project selection purposes and no further project selection action is required by the MPO for WisDOT or Metro Transit to proceed with federal funding commitment.
2. Projects from the second, third or fourth year of the TIP can be advanced by WisDOT or Metro Transit for federal fund commitment without further project selection action by the MPO.
3. Concerning the federal funding sources identified for individual projects in the TIP, it is agreed that WisDOT may unilaterally interchange eligible FHWA funding program sources without necessitating an amendment to the TIP, subject to the project selection authority federal regulations and state and local program procedures reserve for the State and the MPO, and subject to reconciliation under item 4.
4. To maintain accountability and fiscal constraint as changes occur during implementation of the TIP, the MPO, WisDOT and Metro Transit will monitor projects in the TIP and account for all significant changes in scheduled years and costs in a TIP amendment at the midpoint of the calendar year if the changes have not already been accounted for in previous TIP amendments.

2025 - 2029 Madison Area STBG Urban Program

Project	Project ID	Score	Fed. Fiscal Year	Total Est. Cost ¹ (thousands)	Max. Percent (Fed \$)	Federal Funds Approved (thousands)	Comments
Programmed Priority Projects							
MPO Rideshare Program 2025-2029	5992-08-39,52-54	²	2024-2029	\$710	80	\$568	Ongoing support per MPO policy. 3% annual increase, with 4% annual increase starting in 2027
C. Madison Ped/Bike Safety Education Program 2025-2029	5992-08-49, 50, 60	²	2024-2029	\$611	80	\$489	Ongoing support per MPO policy. 3% annual increase.
Mineral Point Rd. (Beltline Hwy. to S. High Point Rd.)	5992-10-19, -20	68 ⁴	2026	\$5,750	80	\$4,600	Funding obligated in '25. Const. in '26. Stormwater box added to project. Const. cost has increased. Separate HSIP project may be eligible for STBG-U funding. Proposing 80% Fed. funding.
John Nolen Drive (Lakeside St. to North Shore Dr.)	5992-11-20, -21-23	57 ⁴	2025	\$41,516		\$1,250	Eligible for other Fed. funding. Const. cost has increased. Madison's total project cost estimate: \$53,455.
N. Bird Street (STH 19 to USH 151)	3996-00-35	50 ⁵	2025	\$953	80	\$762	Proposing 80% Fed. funding. Const. cost has decreased.
N. Thompson Rd. (Main St. to St. Albert the Great Dr.) & St. Albert the Great Dr. (CTH C to N. Thompson)	3996-00-31	43 ⁵	2025	\$3,349	80	\$2,009	Proposing 80% Fed. funding.
Windsor Road (Charlie Grimm Rd. to CTH CV)	6992-00-21	38 ⁵	2025	\$1,376	80	\$840	Proposing 80% Fed. funding.
Nichols Road (Winnequah Rd. to Maywood Rd.)	5994-00-02, -03	38 ⁵	2029	\$1,685	65	\$1,095	Proposing 65% Fed. funding. Project moved from FFY25 to FFY29. Const. cost has been adjusted accordingly. Selected for funding as "small" project.
S. Fourth Street (Milwaukee St. to Isham St.)	5998-00-01, -02	34 ⁵	2025	\$0		\$0	No longer requires STBG-U funding.
				\$55,950		\$11,613	TOTAL
New Priority Projects Approved in October 2023							
West Towne Path (Zor Shrine Place to S. Gammon Road)		86	2028 ⁶	\$3,740	65%	\$2,431	New Path.
Glacial Drumlin Path (I-39/90 to CTH AB/Buckeye Road)		68	2027 ⁶	\$11,114	65%	\$7,224	New Path.
Windsor Road Path (Sunset Meadows Drive to N. Towne Road) New Path on South side of Roadway		65	2029 ⁶	\$620	76.41%	\$474	New Path. Qualifies for 76.41% federal share based on cost formula for projects less than \$1M from Selection Process Document.
Ph. 3 John Nolen Drive / CTH MC/ Olin Avenue (Wingra Creek to Beltline Highway on/off ramps) Pavement Replacement		62.6	2029 ⁶	\$11,750	65%	\$7,638	
Ph. 2 John Nolen Drive (Olin Avenue to Lakeside St.) Reconstruction		58	2028 ⁶	\$6,870	65%	\$4,466	New Path on west side of roadway may be constructed.
CTH MM/Rimrock Road (John Nolen Drive to Beltline Highway on/off ramps)		51	2026 ⁶	\$1,356	80%	\$1,085	Qualifies as a "small" project. Includes a New Path. Proposing 80% Fed. funding.
CTH MM / Rimrock Road (McCoy Rd to Beltline Highway on/off ramps) Pavement Replacement		45	2026 ⁶	\$2,156	80%	\$1,725	Qualifies as a "small" project. Includes a New Path. Proposing 80% Fed. funding.
O'Keefe Avenue (Reiner Road to Summerfield Way) Pavement Replacement		44	2028 ⁶	\$2,253	65%	\$1,464	Qualifies as a "small" project. Will convert two of four travel lanes to bike/bus lanes.
St. Albert the Great Drive (Broadway Drive to N. Bird Street) Pavement Replacement		42	2029 ⁶	\$1,241	65%	\$807	Qualifies as a "small" project. Includes bike lanes.
Vinburn Road (Main Street to N. Towne Road) Reconstruct to Urban Cross Section		37	2027 ⁶	\$2,764	65%	\$1,797	Qualifies as a "small" project. Includes bike lanes.
Holum Street (Railroad to N. Towne Road) Reconstruction		30	2028 ⁶	\$3,939	65%	\$2,560	
Bailey Road (CTH N to Forward Drive) Reconstruction w/ paved shoulders		30	2027 ⁶	\$1,791	65%	\$1,164	Qualifies as a "small" project. Includes bike lanes.
				\$49,594		\$32,834	TOTAL

¹ Includes participating cost only (excludes sanitary sewer and water and construction engineering)

⁴ Score from regular 2022-2026 program application cycle in 2021.

² Funded annually per MPO policy

⁵ Score from supplemental funding 2022-2026 program application cycle in 2022.

³ Score from 2020-2025 program application cycle under previous version of criteria.

⁶ Requested Project Scheduling. Needs to be finalized, working with WisDOT and project sponsor.

Attachment A: Selection Process for Surface Transportation Block Grant (STBG) – Urban Program

Below is an excerpt of the Greater Madison MPO’s Selection Process and Policies for the Surface Transportation Block Grant (STBG)- Urban program funding, last revised May 2023. The full selection criteria document, including detailed project scoring criteria, is available at the following link: https://greatermadisonmpo.org/planning/documents/Item9.2STBG-UrbanProjectsSelectionProcess_5-3-23_5-4-23_Final.pdf.

I. Introduction

The [Infrastructure Investment & Jobs Act](#), also known as the Bipartisan Infrastructure Law, signed into law in November 2021, is the current federal transportation law, providing the policy and funding framework for state and metropolitan area transportation planning and project programming of federal funds. Under the metropolitan planning provisions of law, the Greater Madison MPO, as the designated Metropolitan Planning Organization (MPO) for the Madison Urban Area, is responsible for developing, in cooperation with the Wisconsin Department of Transportation (WisDOT), Metro Transit and other transit operators, a long-range Regional Transportation Plan (RTP) and a Transportation Improvement Program (TIP) for the Madison metropolitan area. The MPO’s current RTP, adopted in May 2022, is [Connect Greater Madison: 2050 Regional Transportation Plan \(RTP\)](#).

The TIP is a coordinated listing of multi-modal transportation improvement projects programmed or budgeted for implementation during the next five-year period.² All projects within the Madison Metropolitan Planning Area involving federal funding or that are regionally significant (e.g., a new interchange, capacity change on regional roadway) must be included in the TIP. For coordination and public information purposes, the MPO also attempts to include other significant projects (e.g., roadway projects located on the regionally classified network) even if only state and/or local funding is being used. Projects in the TIP must be either specifically included in the RTP – in the case of major capacity expansion projects (e.g., added travel lanes, bus rapid transit) – or consistent with the goals, policy objectives, and general recommendations in the plan.

WisDOT and Metro Transit select the projects for the federal program funds that they control. For WisDOT this includes programs that fund state highway projects (e.g., National Highway Performance Program) and programs that fund local projects which WisDOT administers (e.g., Local Bridge, Highway Safety Improvement Program). These projects are submitted to the MPO for inclusion in the TIP. The MPO determines their consistency with the RTP and approves them as part of the TIP process.

As a large MPO (urbanized area population over 200,000), the MPO receives its own allocation of federal highway funding under the Surface Transportation Block Grant (STBG) (formerly named Surface Transportation Program or STP) program, which includes the Urban program and the Transportation Alternatives (TA) program set aside used to fund bicycle/pedestrian projects. Under the IIJA, the MPO now also receives its own allocation of funding under the Carbon Reduction program. The MPO scores and selects projects for funding under these programs using a set of approved screening and scoring criteria. Eligible applicants are Dane County and local units of government.

The MPO’s average annual funding allocation for the STBG – Urban program \$6.86 million, but increased to \$8.99 million under the IIJA. Most of the MPO’s STBG – Urban funding has historically been used for local arterial street (re)construction projects, but STBG – Urban funding can be used for a wide variety of capital projects such as transit vehicles and bicycle/pedestrian projects and TDM programs such as the MPO’s TDM program (“RoundTrip”).

II. 2015 and 2021 STBG (formerly STP) – Urban Program Policy and Scoring Criteria Revisions

The MPO conducted a comprehensive review and revision of its STBG – Urban program policies and project scoring criteria

² The U.S. Department of Transportation considers the fifth year as informational.

in 2014-2015. This was the first comprehensive review since the program policies and scoring criteria were first developed and adopted in the mid-1990s. The project scoring criteria were completely overhauled in order to provide more detailed information to applicants on how projects will be scored and provide more guidance in scoring projects. The changes were also made to better align the criteria with the MPO goals and policies in the Regional Transportation Plan.

Using a consistent framework of scoring categories, the project scoring system developed in 2015 uses different criteria tailored to the major types of potential projects (roadway, transit, bicycle/pedestrian, intelligent transportation systems or ITS). The scoring category weighting varies for some of the project types to reflect the relevance and significance of each category for those types of projects. Some revisions to the scoring categories and weights were made in 2021 to reflect experience with the new project scoring system, new information, and to again better align the criteria with revised goals and policies in the Regional Transportation Plan 2050. The new *Connect Greater Madison plan* maintains the same core goals. The table included after section VI of this document shows the relationship between the RTP 2050 goals and policies and the scoring criteria categories.

The scoring system scale is the same for all projects, regardless of project type, with all capable of earning up to 100 points. This permits a general comparison of the strength of the different applications. However, because the criteria are different for the different types of projects the scoring system is not designed to permit a direct comparison of the scores for the different types of projects. The projects will only be ranked within the each project category. The decision on the mix of projects to fund will be based on the MPO's STBG – Urban Program objectives outlined in Section IV below and priorities of the MPO in any given application cycle.

The following sections of this document outline the MPO's STBG – Urban program objectives and policies, process for selecting projects, and project screening and scoring criteria for evaluating project applications. Some minor revisions were made to the policies in 2019 and again in 2021.

III. Regional Transportation Plan and IJJA Goals

The following are the goals for the regional transportation system identified in the *Connect Greater Madison: 2050 RTP*:

1. Livable Communities

Create connected livable places linked to jobs, services, education, retail, and recreation through a multimodal transportation system that supports compact development patterns, increasing the viability of walking, bicycling, and public transit.

2. Safety

Ensure that the transportation system enables all people to get to where they need to go safely with an emphasis on enhanced protection for vulnerable roadway users through use of a safe systems approach, thereby helping to achieve the long-term goal of eliminating fatal and serious traffic injuries.

3. Prosperity

Build and maintain a transportation system that provides people with affordable access to jobs, enables the efficient movement of goods and services within the region and beyond, and supports and attracts diverse residents and businesses, creating a shared prosperity that provides economic opportunities for all.

4. Equity

Provide convenient, affordable transportation options that enable all people, regardless of age, ability, race, ethnicity, or income, to access jobs, services, and other destinations to meet their daily needs; engage traditionally underrepresented groups; and ensure that the benefits of the regional transportation system are fairly distributed, taking into consideration current inequities resulting from past decisions, and that environmental justice populations are not disproportionately impacted.

5. Environmental Sustainability

Minimize transportation-related greenhouse gas emissions that contribute to global climate change; avoid, minimize, and mitigate the environmental impacts of the transportation system on the natural environment and historic and cultural resources; and design and maintain a transportation system that is resilient in the face of climate change.

6. System Performance

Maximize the investment made in the existing transportation system by maintaining it in a state of good repair and harnessing

technological advances; promote compact development and travel demand management to minimize new roadway lane-miles and maximize mobility options; and manage the system to maximize efficiency and reliability.

The federal transportation act, MAP-21 (2012), set in motion the requirement to implement a performance-driven, outcomes-based, transportation planning and decision making process. The FAST Act carried over and built upon the national performance goals established in MAP-21, and the IJJA continues those goals.

- Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency
- Increase the safety of the transportation system for motorized and non-motorized users
- Increase the security of the transportation system for motorized and non-motorized users
- Increase accessibility and mobility for people and freight
- Protect and enhance the environment, promote energy conservation, and improve the quality of life for the community
- Promote consistency between transportation improvements and planned State and local growth and economic development patterns
- Enhance the integration and connectivity of the transportation system for all modes
- Promote efficient system management and operation
- Emphasize the preservation of the existing transportation system
- Enhance travel and tourism
- Improve the resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts of transportation

IV. STBG – Urban Program Objectives and Policies

A. Objectives

The MPO will accept applications for most types of eligible projects under the STBG – Urban program. However, in an effort to maximize federal funding to the region and balance the needs of the different modes of transportation, the availability of alternative federal sources of funding for certain types of projects (e.g., STBG – Transportation Alternatives Set Aside Program for bicycle/pedestrian projects, Bridge Program, Highway Safety Improvement Program (HSIP) for certain safety projects, and FTA transit formula and discretionary programs for transit projects) will be considered in making project funding decisions.

The specific MPO objectives for the STBG – Urban program are to:

1. Fund the highest priority projects that will help achieve the goals and recommendations of the RTP as outlined in the *Connect Greater Madison: 2050 Regional Transportation Plan (RTP)*, including sub-element plans, national performance goals specified in the IJJA, and other regional performance measure goals as identified in the MPO's annual Performance Measures Report.
2. Evaluate candidate projects fairly, using appropriate criteria reflective of these goals and policy objectives, which are consistently applied.
3. Use performance-based standards to evaluate projects, where feasible.
4. Utilize STBG-Urban funds for projects with the highest need considering availability of other federal and state funding sources.
5. Maximize the amount of discretionary federal and state funding to the Madison metropolitan area, including HSIP and Bridge funds for roadway projects and STBG Transportation Alternatives Set Aside funds for bicycle/pedestrian projects.
6. Utilize STBG-Urban funds on projects that have demonstrated local support and commitment and will likely be ready to proceed when scheduled for construction.
7. Utilize STBG-Urban funds generally on larger-sized projects with significant beneficial impacts to the regional transportation system to ensure efficient utilization of both local and state administrative resources given the extensive requirements for federally funded projects.
8. While recognizing the above objective, also strive to achieve equity in funding of projects over time from a geographic standpoint. In part to achieve this objective, the MPO will seek to utilize on average up to 10% of its funding allocation on smaller, relatively low cost projects over time (see Project Funding under Section B below). This percentage is likely to vary in any particular application cycle depending upon project applications received and prior project funding decisions.

B. Policies

Eligible Project Categories

The MPO will accept applications for most types of projects eligible for funding under the STBG-Urban program, as listed below:

1. Construction, reconstruction, rehabilitation, and operational improvements for roadways functionally classified as arterials or collectors, and bridges on roadways of all functional classifications, including improvements necessary to accommodate other modes of transportation and drainage systems for roadway runoff.
2. Capital costs for transit projects.
3. Construction or enhancement of multi-use paths and/or grade separated bicycle/pedestrian crossings of major barriers.
4. Roadway and transit safety infrastructure improvements, including projects related to intersections that have disproportionately high crash rates and/or high levels of congestion.
5. Capital and operating costs for traffic monitoring, management, and control facilities and programs.
6. Infrastructure-based intelligent transportation systems (ITS) capital improvements.
7. Surface transportation planning programs.
8. Transportation demand management (TDM) programs, including rideshare/carpool programs and establishment and provision of transportation services by Transportation Management Associations.

Federally eligible projects for which the MPO will not utilize its STBG-Urban funds include reconstruction of existing multi-use paths or recreational trails unless the project includes a substantial enhancement (e.g., paving, widening), independent sidewalk projects (e.g., to comply with ADA), and most “transportation enhancement” activities, including environmental mitigation, historic preservation, and scenic beautification (see 23 U.S.C. Section 133 (b) for the complete list of eligible project activities under federal law).

Eligible Cost Categories:

The following are eligible costs for roadway projects under federal law and MPO policy:

1. Street/roadway construction*
2. Drainage systems needed to carry storm water runoff from street/roadway**
3. Sidewalks***
4. Multi-use path, grade separated ped/bike crossing in corridor (where appropriate)
5. Transit facilities (e.g., bus priority treatment, bus pad, bus pull-out, bench or shelter, park-and-ride lot), including real estate cost for transit stops/stations.
6. Park-and-ride facilities in conjunction with roadway or transit projects, including real estate cost.
7. Standard streetscape items (lighting, colored crosswalks, etc.)
8. Signs and signals (where warrants are met)
9. Standard landscaping items (street trees, plants, etc.)

* The needs of bicyclists and pedestrians must be considered for all roadway projects per federal and MPO policy. Projects must comply with the MPO’s “complete streets” policy.

** Expansion of storm water system for future/planned development is not an eligible cost, but the local unit of government can fund the difference with 100% local funds.

*** Local units of government may only assess for the local match.

Utilities (e.g., water, sewer) are not an eligible roadway project cost per federal law. Real estate acquisition, engineering/design, and compensable utility relocation are eligible costs per federal law, but not eligible under MPO policy in order to stretch the limited available federal funding. Exceptions: WisDOT design review costs and real estate costs for transit related and park-and-ride facilities, as stated herein

Minimum/Maximum Project Cost Amounts

In order to ensure efficient utilization of state and local administrative resources given the significant additional requirements for federal projects and to fund projects with significant beneficial impacts, the MPO will apply the following total project cost minimums to STBG-Urban projects:

- Roadway Infrastructure Projects: \$750,000
- Transit and Independent Pedestrian/Bicycle Infrastructure Projects: \$300,000
- Transit Vehicle, Intelligent Transportation Systems (ITS), and other Capital Purchase Projects: \$125,000
- Non-Infrastructure Projects (e.g., TDM programs): \$75,000

There is no maximum project cost amount, but segmentation of projects over \$10 million is strongly encouraged.

Project Funding

Per long-standing policy, the City of Madison’s pedestrian/bicycle safety education program and the MPO Rideshare/TDM program will continue to receive an “off-the-top” allocation of total STBG-Urban funding. The allocation for the City of Madison’s pedestrian/bicycle safety education program will be based on a 3% annual inflationary increase from previous year levels. The allocation for the MPO Rideshare/TDM program will be based on a 4% annual inflationary increase from previous year levels, starting with the 2024-2029 program cycle. No “off-the-top” allocation of funding will be provided for any other project at this time.

No set percentage or sub-allocation of funds will be directed toward particular types of projects (e.g., roadway preservation vs. capacity expansion or roadway vs. transit) in order to maintain maximum flexibility to fund the highest priority projects taking into account all other project funding sources and other program objectives.

The MPO will seek to allocate up to 10% of the available funds for projects with a total cost of no more than \$3 million. The actual amount of funding allocated for small, lower cost projects will vary with each program cycle and will depend upon required funding for the highest scoring/priority projects, remaining funds available, number and strength of small project applications, and project funding in previous program cycles.

The MPO will utilize the project scores and ranking by project type and size as the primary basis for awarding project funding. Final decisions on the award of funding, including the distribution of funding between the different project types, will be based on the MPO’s STBG-Urban program objectives outlined above.

Cost Share

In order to stretch the limited STBG-Urban funding available over a greater number of projects, the MPO generally requires more than the minimum 20% local match for federally funded projects. Under WisDOT local program policy guidance designed to comply with federal fiscal constraint requirements, the MPO is not able to maintain a “reserve or contingency” fund and therefore has little flexibility to increase funding for approved projects that increase in cost from the initial estimate. In order to mitigate the risk of cost increases and provide additional support for priority projects, the MPO reduced the required local share for projects from 50% to 40% for new projects programmed beginning with the 2016-2020 program cycle. The federal cost share was therefore increased from 50% to 60%. Beginning with the 2024-2029 program cycle, the federal share for new projects will be 65% and the local share will be 35%. This applies to all projects costing \$1,000,000 or more. The standard minimum 20% local cost share will be applied for projects not exceeding \$500,000. A sliding scale for cost share will be used for projects costing between \$500,000 and \$1,000,000 as outlined below.

Formula for computing the federal share:

P = Federal participation percentage (round to zero decimal places)

X = Project cost

Total Project Cost	Federal Share (Percentage)
< \$500,000	80%
\$500,000 - \$1,000,000	$P = 80 - ((X - 500,000) / 33,333.33)$
> \$1,000,000	65%

Conditional Project Approval

Major street construction projects involving capacity expansion, property acquisition, a railroad crossing, potential impacts to sensitive environmental areas or parkland, and/or other complicating factors can take five (5) years or more to complete the process from initial project concept to construction. Because of this and the limited flexibility under WisDOT policy for MPOs to modify the schedules and funding of approved projects, the MPO has adopted a policy providing for conditional approval of

major projects beyond the current 5-year program cycle in limited cases for high scoring projects. By conditionally approving a project, the MPO is indicating that it will provide funding for the project in the subsequent program cycle if funding is available after funding already approved projects and any other higher priority projects that have also been conditionally approved (if more than one). New projects for which funding is applied for in the subsequent application cycle will not “bump” the conditionally approved project even if they have a higher score. Any conditional funding shall not exceed 75% of the anticipated funding available in the next program cycle.

The reason for this conditional approval policy is to provide assurances to a project sponsor that the project will eventually be funded so that the sponsor can feel comfortable investing local funds to begin the design and environmental study process for the project since per MPO policy such costs are not eligible for funding. The condition on which the project is approved is that the design process be far enough along at the time of the next funding cycle that it is reasonably certain the project will be able to be constructed in the year in which funding is programmed. The conditional approval applies only to the scope of the project at the time of the initial project application. Any major changes to the scope of the project or large increases in project cost would render the conditional approval invalid.

Project Management

Once projects are initially approved by the MPO, the projects are scheduled through a collaborative process that includes input from the local project sponsor and WisDOT, which manages the statewide STBG program for MPOs. The local project sponsor shall provide a schedule update (Environmental document, RE, DSR, PS&E, LET) as part of the annual TIP update process. Subsequent schedule changes must be approved by the MPO and WisDOT per WisDOT’s Local Program Guidelines. WisDOT SW Region’s Local Program Manager will work with local project sponsors and MPO staff through the project development process to ensure that projects stay on schedule for construction, or in the event of delays or unforeseen circumstances, to make adjustments to the schedule well ahead of construction. Any schedule change must be approved by the MPO and WisDOT.

If a project sponsor is not meeting the schedule for delivering a project, the MPO reserves the authority to withdraw approval of STBG-Urban funding for the project in order to maximize the MPO’s allocation of current and future allocations of federal funding and/or avoid the risk of losing federal funding under WisDOT’s program guidance. The project sponsor may also decide to not move forward with a project for various reasons. In this event, written notice to the MPO shall be provided as soon as possible to allow the funds to be reallocated to another project. In the event federal funding is removed from an STBG-Urban project under either of these circumstances, the MPO will follow its procedures for major amendments to the TIP, which calls for notice and a minimum 15³-day public comment period and hearing before the MPO Policy Board.

Reallocation of STBG-Urban Funds in the Event of a Project Delay or Cancellation

In the event the MPO must reallocate funding from one project to another due to project delays or cancellation of a project, the general priority for use of the funds is:

- (a) Provide additional funding for already approved project(s) that are short of the maximum 60% federal funding share due to increases in the project cost estimate that are not the result of major changes in the scope of the project;
- (b) Provide funding for new project(s) from the list of candidate projects from previous STBG-Urban application cycles if the project(s) are far enough along in the design process that they are reasonably likely to be ready for construction in the same year(s) as the funding is available.
- (c) Provide additional funding up to the federal maximum of 80% for approved projects programmed in the year the funding is available.
- (d) Provide funding for a new project not on the candidate project list that is reasonably likely to be ready in the same year(s) as the funding is available (e.g., roadway maintenance, bus or ITS equipment purchase).

The ability to follow these general priorities will depend upon the ability to move the funding from one year to another, amount of funding to be reallocated, cost of potential projects to be added, and other factors. In general, funding programmed within the following 2-3 years must be spent in the same year, otherwise the funding will be lost. Given the possibility of project delays or cancellations it is desirable to have projects that are ready or close to ready for construction that can be substituted for cancelled projects. Project sponsors are encouraged to continue to move projects forward through the federally required environmental study and design process even if they are not funded in a given program cycle if they score reasonably well in order to maintain some “on the shelf” projects.

V. Process

MPO staff initiates the process of soliciting applications for STBG-Urban program projects biennially in the spring of odd numbered years in conjunction with the WisDOT Local Program process. A five- to six-year program of projects is maintained with this process. Typically, with each program cycle projects will already be scheduled for the first three years and the biennial process will allow for any needed adjustment in the schedule for those projects. Funding will be available and awarded for the 4th and 5th (or in some cases 6th) year projects in the program.

The request for project applications typically goes out in April. Project applications are generally due in June. Project sponsors are strongly encouraged to meet with MPO and WisDOT SW Region staff well in advance of submitting an application to review the scope, timeline, potential complicating factors, cost estimate, etc.

MPO staff scores and ranks the projects by project type according to the criteria outlined below, and make a recommendation on the projects to be funded. Funding is allocated to projects based on the cost share policy outlined above. The actual cost share for each project will depend upon the cost of all programmed projects and the MPO's funding allocation. Per WisDOT policy⁴, all available funding must be programmed in each program cycle. Funding may not be reserved for cost increases or carried over from one program cycle to another. In cases where there is not sufficient funding to cover the full federal cost share per MPO policy, the local project sponsor may agree to contribute greater than the minimum local cost share but in no case can the federal cost share be less than 50% when the project is first approved and brought into the program.

The MPO's Technical Coordinating Committee (TCC) reviews the MPO staff's scoring of projects and recommendation regarding projects to be funded. The committee make an initial recommendation on the program of projects to the MPO Policy Board. The MPO Policy Board reviews and approves the preliminary program of projects, with any changes, for inclusion in the draft TIP distributed for public review and comment. Following the public review process, the TCC makes a final recommendation on the STBG projects and funding to the MPO Policy Board. The MPO Policy Board reviews and approves the TIP, including the STBG-Urban projects, for submittal to WisDOT for approval and inclusion in the Statewide TIP.

VI. Project Selection Criteria

Two types of criteria are used in the STBG project selection process: (a) screening criteria; and (b) scoring criteria.

Screening criteria are first used to ensure that the proposed projects meet eligibility requirements, are consistent with the adopted *Connect Greater Madison: 2050 Regional Transportation Plan (RTP)*, have local policy body commitment, and have a reasonable expectation of being implemented in the schedule outlined or at a minimum the required time frame. Per WisDOT sunset policy, projects must be constructed and in final acceptance within six and a half years from the start of the year following project approval.

Scoring criteria are used to evaluate the merits of the projects. The scoring criteria have been designed to incorporate the goals of the *Connect Greater Madison: 2050 Regional Transportation Plan* and goals of the IJJA. Performance-based criteria have been used to the extent feasible while providing necessary flexibility in the evaluation of projects.

A. Project Application Screening Criteria

1. All projects must be included in or consistent with the *Connect Greater Madison: 2050 Regional Transportation Plan, Regional Intelligent Transportation Systems (ITS) Strategic Plan*, and other separate mode-specific elements of the plan such as the five-year Transit Development Plan and the Bicycle Transportation Plan.
2. All major roadway and transit capacity expansion projects must be listed by reference in the financially constrained *Connect Greater Madison: 2050 Regional Transportation Plan*.
3. All roadway projects must comply with the MPO's Complete Streets Policy, adopted by the Policy Board at their meeting on May 3, 2023. Sidewalks with ADA compliant curb ramps and appropriate bicycle accommodations are expected for projects in developed and developing areas with limited exceptions (e.g., real estate required and not feasible due to state law).
4. Projects are expected to have a reasonable cost relative to benefit in terms of helping achieve the RTP goals and policies and number of people served. Given limited available funding, project cost is a factor in making project funding recommendations.

⁴ WisDOT administers the STBG-Urban funding program statewide for all MPOs and smaller urban areas.

5. For bus purchase projects, the transit agency shall maintain a maximum spare ratio of 20% of vehicles operated in peak or maximum fixed-route service after acquisition of the new buses. Any new buses resulting in that ratio being exceeded would not be eligible for funding.
6. Bicycle projects must be located on the MPO defined primary or secondary bikeway route system, or in an essentially parallel and equivalent corridor, to be eligible for funding. [Note: The bikeway network has been classified into primary, secondary, and local routes according to the function they serve or are planned to serve within the overall network. Primary routes are typically high volume, direct, longer distances routes that are comfortable for the majority of bicyclists and serve major destinations. Secondary routes fill in the gaps between primary bikeways and provide neighborhood access. They typically consist of lower use routes. Local routes provide access to the secondary and primary network.]
7. Projects shall not create significant adverse human health, environmental, social, or economic impacts on Title VI/ environmental justice population groups or fail to avoid those impacts that could be avoided or mitigate unavoidable impacts on these groups.
8. Local Policy Body Commitment

The project must have the approval of the local policy body and a demonstrated commitment of financial resources to provide the required local funds for design and right of way (if needed) and local matching funds for construction in the schedule outlined. The commitment may be demonstrated by inclusion of the project in an approved capital budget plan or by local resolution approving the project application and committing local funds for the project. For multi-jurisdictional projects, an agreement in principle on cost sharing and future jurisdiction and maintenance must be reached within one year of approval of the project and demonstrated through a memorandum of understanding or similar document. Otherwise, approval of the project funded will be rescinded and the funding reallocated to other project(s) based on the policy outlined above.

9. Timely Implementation

In order to be considered for funding, projects must be fully scoped and applicants must demonstrate that the project has a high likelihood of being implemented within the proposed schedule. The WisDOT document at the following link, along with other factors such as the need for right of way acquisition, rail crossings, potential environmental issues, and the need for detailed traffic operations analysis, will be used as a general guide in determining whether or not the project is likely to be able to be implemented within the proposed schedule: <https://wisconsindot.gov/Documents/doing-bus/local-gov/astnce-pgms/highway/tools/definitions.pdf>.

According to this WisDOT guidance document, applicants should plan for up to two (2) years for design for simple resurfacing and pavement replacement projects and 4-5 years or more for reconstruction projects depending upon the scope and cost.

10. Financial Requirements

All projects must include reasonable, accurate cost estimates that are supported by an itemized project budget, which should be attached to the application. Cost estimates should be in current year dollars. The MPO will then use an annual inflation rate and the proposed year of construction to determine the funding award. The MPO will provide the contingency factor/ percentage to use for projects depending upon the level of design completed. For projects that have not yet reached 30% design, this is typically 20-30% of construction cost. The purpose is to ensure consistency across applications and account for the uncertainty in cost estimates for projects at an early design phase.

For resources to aid in developing roadway project cost estimates, see local tools developed by WisDOT at the following link: <http://wisconsindot.gov/Pages/doing-bus/local-gov/astnce-pgms/highway/tools.aspx>.

Larger projects with construction proposed to be done in phases over multiple years must have a reasonable project phasing schedule. All sources of funding in addition to the requested STBG-Urban funds should be identified.

Introduction and Background Information

Title VI of the 1964 Civil Rights Act (42 U.S.C. 2000d-1) states that “No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.” To further amplify Title VI, President Clinton issued Executive Order 12898 in 1994, *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations*. The purpose of the order is to make achieving environmental justice part of each Federal agency’s mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of government programs, policies, and investments, such as transportation facilities, on minority and low-income populations. The goal is to ensure that the benefits and burdens of all government actions and investments are fairly distributed, and that minority and low-income populations are not disproportionately affected in an adverse way.

In 1997, the U.S. Department of Transportation (USDOT) issued an order to summarize and expand upon the requirements of Executive Order 12898 on Environmental Justice. The Order generally describes the process for incorporating environmental justice principles into all DOT existing programs, policies, and activities.

President Biden established the Justice40 Initiative with Executive Order 14008 in 2020, and implementation guidance in 2021 and 2023. Justice40 programs are required to engage in stakeholder consultation and ensure that community stakeholders are meaningfully involved in determining program benefits. Justice40 is intended to direct at least 40% of federal funding in covered programs, including USDOT programs, to historically disadvantaged communities. Disadvantaged communities are identified through the [Climate and Economic Justice Screening Tool](#) (CEJST).

Title VI, Executive Order 12898, the USDOT order, Executive Order 14008, and other USDOT guidance do not contain specific requirements in terms of evaluating the impacts of transportation plans and programs on environmental justice populations. As part of its efforts to address environmental justice, the Greater Madison MPO (Metropolitan Planning Organization) conducts a qualitative transportation project analysis of the TIP, comparing the location of transit services and programmed projects in relationship to areas with concentrations of locally-identified environmental justice (EJ) populations.

Evaluating the environmental justice (EJ) impacts of transportation infrastructure and policies is a critical part of the MPO’s planning activities. Mapping EJ populations in relation to existing and planned transportation infrastructure, jobs, and other destinations is one of the primary screening tools that planning agencies use to assess whether the transportation needs of EJ residents are being adequately served, and whether the costs and benefits of transportation projects and policies are fairly distributed. However, because EJ populations include a wide variety of potentially vulnerable groups—racial and ethnic minorities, people with low incomes, people with disabilities or other health-related challenges, zero-car households, etc.—they can be hard to map. Data about these populations can be unreliable or unavailable, and different data types and sources makes them difficult to combine. The CEJST identifies disadvantaged communities in the greater Madison area, but as they are identified based on national benchmarks, the CEJST does not identify many areas that the MPO considers to be Environmental Justice areas based on regional benchmarks.

Methodology for Identifying Environmental Justice Areas

Planning agencies often display different EJ population data separately, either by showing available race, income, and other measures overlaid on a single map or individually across a series of maps. This is how the MPO mapped EJ populations prior to the 2021-2025 TIP. It is difficult, however, for readers to discern the EJ areas with the greatest concentrations of vulnerable populations when viewing several different types of demographic information. In order to simplify EJ analysis, the MPO has defined two tiers of EJ Areas based on the concentration of low-income and racial/ethnic minority residents. While these two measures do not encompass the full range of potential EJ populations, they include the largest EJ categories and data about minority and low-income populations is widely available and relatively reliable. Furthermore, there is a high degree of correlation between minority and low-income populations and other EJ indicators, including Limited English Proficient (LEP)

and zero-car households; the EJ Areas correspond to concentrations of those populations as well.

The MPO's EJ Areas were identified based on their concentration of minority (non-White and/or Hispanic) and low-income residents (those with household incomes below 150% of the federal poverty level). Each 2010 block group in the MPO area received an EJ index score of up to 8 points; block groups could receive up to 4 points each for their concentration of minority and low-income residents, according to the scoring system below.

Minority Score: Points were awarded based on percentage of minority (Hispanic and/or non-white) residents in 2010 Census block group based on 2010 complete US Census data. Scores were assigned as follows: 23.5%-31% (1.5-2x MPO Area Average) = 2 pts; 31-38.75% (2-2.5x MPO Average) = 3 pts; 38.75%+ (>2.5x MPO Average) = 4 pts.

Poverty score: Points were awarded based on the percentage of residents with household incomes below 150% of poverty level based on American Community Survey (ACS) 2013-2017 block group data. Scores were assigned as follows: 28.5%-38% (1.5-2x MPO Average) = 2 pts; 38-47.5% (2-2.5x MPO Average) = 3 pts; 47.5%+ (>2.5x MPO Average) = 4 pts.

Because of the large margin of error in the ACS household income data, some block groups were awarded additional points to correct what MPO staff believed to be underestimates of their low-income population. Adjustments were only made to zones that initially scored below 6 - the minimum threshold for designation as an EJ Area - in cases where a higher estimate within the margin of error would result in a score of at least 6. Additional points were only awarded to zones with a high proportion of students eligible for free and reduced price school lunch.⁵ Zones receiving additional points in their adjusted index score were awarded the minimum number of points to reach a score of 6. No scores were adjusted downward. Because of the imprecision inherent in the estimates and adjustments used to define EJ Areas, they should not be compared to one another based on their index scores.

After the EJ Areas were identified, block group geographies were adjusted to generally exclude non-residential land uses, with the exception of some schools and parks. EJ Areas do not necessarily encompass all residential portions of their 2010 census block group. In one case, the residential portion of a block group has been divided between two separate EJ Areas. In other cases, where higher income residential areas are located within the same block group but are not contiguous with lower income areas, EJ Areas include only the lower income areas.

After applying this methodology to the EJ Analysis in the 2021-2025 TIP, the MPO developed a second tier of EJ Areas with slightly lower concentrations of vulnerable populations than the original EJ Areas (Tier 1 EJ Areas), but which still have higher-than-average concentrations of these populations. This analysis is based on the newer two-tier EJ Area methodology first used in the 2022-2026 TIP. Due to changes in 2020 Census geographies, no recent tabulation of free and reduced-price school lunches, and an ongoing effort by the City of Madison to develop a consistent county-wide EJ mapping scheme, the MPO did not update its EJ areas with 2020 Census data. Beginning with the 2024-2028 TIP, the MPO published a [web map](#)² showing the MPO-identified EJ areas, TIP projects, and CEJST data.⁶

Transit Service and Major Projects Analysis

The map at the end of this appendix shows the transit service areas⁷ for Metro Transit's fixed-route system, the City of Monona's bus route, the Stoughton shared-ride taxi system, and the location of programmed major⁸ roadway and bikeway projects. Current (2024) transit service areas and programmed projects are shown in relationship to EJ Areas. The City of Monona is scheduled to cease operation of its stand-alone transit system and become a Metro Contracted Service Partner in March of 2025; changes to the transit service area resulting from this transition are not shown on this map.

⁵ Madison [Neighborhood Indicators Project](#) special tabulation by the UW- Applied Population Lab, 4/28/2020.

⁶ ESRI 2022

⁷ Defined by a ¼ mile radius from transit stops.

⁸ "Major" projects means generally those costing \$400,000 to \$500,000 or more and that have a significant impact. For example, some state highway bridge painting projects that cost significantly more than this amount are excluded. Projects costing less than this amount generally don't have a significant impact and/or are on the local street system and aren't suitable for a regional analysis such as this one.

Transit Service Analysis

Fixed-route transit service areas encompass nearly all of the areas with concentrations of EJ populations, although for some areas it is greater than ¼ mile to the nearest stop. The largest of these apparently un-served EJ areas, the UW Arboretum and Fitchburg between Fish Hatchery Road and Syene Road, are undeveloped and not residential areas. Similarly, large portions of the Justice40 Disadvantaged Census Tracts adjacent to but largely not within the Metro service area consist of the UW Arboretum and the Dane County Regional Airport. Justice 40 Partially Disadvantaged Census Tracts in the Madison area are largely rural or parks and open space; the Village of McFarland is an exception, but as McFarland has not opted to become a Metro Service Partner, Metro is prohibited from providing service in this area. The far southeast of Madison, including the Owl Creek neighborhood and the World Dairy area, has mid-day transit service approximately every 80 minutes (Route L), the lowest service frequency of any fixed route in the Metro system. EJ areas in north Madison are served by routes with mid-day headways varying from 15 (Route B) to 80 minutes (Route L). In a public survey conducted by the MPO in May and June 2024, many comments were received that Route L service frequency is not sufficient to be useful, and that transfers to other routes from north Madison routes are more difficult following the elimination of the North Transfer Point in 2023. EJ areas in southwest Madison are served by routes with 30-minute mid-day headways (Routes D2, E, and H) as well as limited-stop peak-hour-only routes 55 and 75 between Madison and the Epic campus in Verona. Many comments received during the public survey mentioned above requested mid-day and weekend service on routes 55 and 75 to make them more useful for trips other than commuting to and from Epic; as these routes are paid for by Epic through the City of Verona, such changes to service are beyond the control of Metro and the City of Madison. Many comments also requested direct service between southwest Madison and the UW/VA Hospital area, with scheduled stops designed to support health care workforce transportation. EJ areas in west Madison and Middleton are served by routes R1 and R2 with hourly mid-day service, with some areas also served by route F with 30-minute mid-day headways. Comments in the public survey requested increased service frequency on both R1 and R2, and that the F and R routes continue all the way to the Capitol Square evenings and weekends as opposed to stopping at Sheboygan & Eau Claire. As with service to and through Verona, service within Middleton is paid for and must be approved by the City of Middleton, including portions of Routes F and R2.

Although EJ populations in Stoughton have local publicly subsidized shared-ride taxi service for local trips, the cost per ride can be prohibitive for some. Stoughton residents do not have public transit service or affordable taxi service into the Madison area where they could connect to Metro Transit. Sun Prairie implemented weekday peak express bus service to downtown Madison in August 2019 and all-day local service with a connection to Madison and the rest of the Metro network in June 2023. These services are part of Metro Transit's fixed-route service and standard transfers between the Sun Prairie routes and other Metro fixed route services are available at no additional charge. Sun Prairie's connection to the rest of the Metro system will be upgraded to a Bus Rapid Transit local service extension in 2024.

East-West BRT and the accompanying local service extensions, for which Small Starts funding has been awarded, will enter service in 2024 and will dramatically improve transit travel times, service frequencies, and access to destinations over pre-Network Redesign services. North-South BRT planning and design work is currently underway and is funded through a federal Areas of Persistent Poverty grant, and an application for Small Starts funding was submitted in 2023. Combined with the Metro Transit Network Redesign, the East-West and North-South BRT services will improve transit travel times, service frequencies, and access to destinations for residents of EJ areas in North, South, East, West, and Central Madison, Middleton, and Sun Prairie. The Network Redesign service plan was designed to improve transit access for the majority of area residents, including low-income and minority residents. Additionally, a [Title VI analysis](#) of the service plan conducted by Metro and their Consultant, Jarret Walker + Associates, with support from the MPO, found that minority and low-income residents would benefit from the Network Redesign at the same or greater rates than the population in general. Metro completed a [Title VI Service Equity Analysis](#) in July 2024 that includes all service changes implemented following the Transit Network Redesign. Given these extensive and detailed equity analyses of the new service network, any further analysis here would be redundant.

The COVID-19 pandemic, which struck the U.S. in early 2020, resulted in a statewide "Safer-At-Home" order which resulted in unprecedented reductions in ridership as workers no longer used transit to commute and non-work trips were sharply curtailed. Social distancing requirements resulted in dramatically reduced capacity on public transit vehicles of all types, from shared-ride taxis to fixed-route buses. Metro immediately responded to the decline in ridership and increased vehicle sanitization needs by reducing service to Saturday routes and schedules, with the addition of weekday commuter routes serving Sun Prairie, Verona (Epic), and other high-ridership routes. As part of a phased expansion of service from this minimized level of service, service improvements implemented in August 2020 were targeted to serve neighborhoods with a high proportion of low-income and minority residents.

Metro conducted an equity review of the August 2020 service improvements and identified two areas of equity concern: "Tree

Ln. on the west Side and N. Thompson Rd. on the east side. N. Thompson Rd. typically saw very few boardings (less than 10 per day) pre-COVID and is within a relatively easy walk (1/3 of a mile) of Swanton Rd. or Milwaukee St., where service remains. Tree Ln. is similar, but is a bit further (1/2 mile) from service on Mineral Point Rd. In both cases, it appears that people are already walking a bit to get better service further away.”

The MPO conducted an independent EJ Analysis of the proposed August 2020 service improvements, using the (original) Tier 1 EJ Areas described above. The MPO analysis identified four EJ Areas where the August 2020 service improvement plan initially raised equity concerns: Wexford Ridge-Walnut Grove (Tree Ln. area in Metro equity review); Jamestown; Arbor Hills; and Swanton (Thompson Rd. area in Metro equity review). The south end of Jamestown is nearly 9/10 of a mile from 30-minute service, with direct service every 60 minutes; however, this level of service is unchanged from 2019’s Route 52 and is not a service change. Portions of Arbor Hills are as far as ½ mile from 30-minute service, with direct service every 60 minutes; however, this area was served by peak-only 30-minute Route 47 and 60-minute Route 40 under the August 2019 route structure - the change to service is a reduction from 30- to 60-minute peak period service. The few stops affected by this change had 1.5-2 average weekday boardings in 2018. Given the reductions to service experienced by many non-EJ Areas under this service plan, this is not a disproportionate reduction in service to the Arbor Hills EJ Area. MPO staff concur with Metro’s equity review findings regarding service impacts to the Wexford Ridge-Walnut Grove and Swanton neighborhoods. While 60-minute service is not frequent enough to be practical for many trips and will result in overall longer travel times compared to 30-minute headways due to increases in potential wait times, the average number of boardings at affected stops in these areas are so low that they do not justify higher service frequencies.

2021 service changes included discontinuing routes 10 and 27 and dedicating those resources to increased service on route 28, which overlaps much of the discontinued routes and provides service between the West and North Transfer Points, both of which are heavily used by riders who live in EJ areas; route 28 was modified to directly serve Eken Park, an EJ area. Route 38 was restored, with added mid-day service. Five routes were re-aligned to run on West Washington Ave instead of on State St; this service shift increased transit service levels for EJ areas in the near west downtown Madison area, but given the short distance of the diversion overall impacts to transit access are minimal. Various bus stops were relocated for safety or operational reasons, others were improved with concrete pads or other accessible features throughout the service area.

No service changes occurred in 2022.

In June 2023, the Metro Transit Network Redesign went live, with almost every route⁹ in the system being eliminated and replaced with completely different service patterns. As stated above, a Title VI Service Equity Analysis conducted for the Network Redesign found that transit access would be improved for minority and low-income populations at a higher rate than it would be for the population at large. As required by Title VI and FTA implementing regulations, Metro subjects all proposed major service and fare changes to an equity analysis to prevent disparate impacts to minority and/or low income populations.

The MPO adopted the *2013-2017 Transit Development Plan for the Madison Urban Area* in 2013, which was intended to guide future service changes and improvements. An update to the Transit Development Plan (TDP) was initiated in 2019, with expected completion and adoption in 2021 in conjunction with a comprehensive Network Redesign project, which would restructure Metro service to integrate with the planned east/west Bus Rapid Transit service. During development of the TDP it became clear that, due to significant duplication of content between the Network Redesign and the TDP, it would not be an efficient use of staff time to conduct both processes concurrently. Accordingly, the TDP update was postponed and is being restarted in the late summer/fall of 2023. The draft updated TDP is expected to be released for public comment in the fall of 2024 and to be adopted late in 2024.

As part of its Title VI compliance monitoring, Metro Transit updates its Title VI Plan every three years. The [current plan update](#) was adopted in October 2023, and reports on 2020-2022. The plan highlights Metro’s current fixed-route service standards, service quality/policies, fare equity policy, and equity analyses of service and fare changes since the last plan was adopted. The policies and analyses help ensure that the level of service and location of routes, age/quality of vehicles assigned to routes, and stop and other facilities are being provided in a non-discriminatory manner, and that the fare structure is also equitable.

Pedestrian/Bicycle and Roadway Projects Analysis

The map at the end of this appendix shows major local roadway construction and reconstruction projects in blue, and major bicycle and pedestrian projects in green. The map shows a number of major roadway corridor and intersection projects directly adjacent to EJ areas in the Cities of Fitchburg, Madison, Middleton, and Sun Prairie.

9 Routes 55, 75, 80, 81, 82, and 84 remained essentially unchanged

There are no programmed major capacity expansion roadway projects in the Madison area that would result in significant adverse impacts to EJ areas. Capacity expansion projects in the MPO planning area—CTH M (Oncken Rd. to STH 113), Pleasant View Road, Parmenter Street, USH 51 in Stoughton—are located on the periphery of the urban area in developing areas. There are no EJ areas within the vicinity of these projects.

Major bicycle projects are planned through or in proximity to and serving EJ areas in the Cities of Fitchburg, Madison, Middleton, and Sun Prairie.

There are several intersection safety projects in the City of Sun Prairie along Main Street and in the STH 19 and USH 151 interchange area that will benefit EJ areas. In Madison, the Troy Drive railroad bridge replacement, Autumn Ridge path and overpass of STH 30, Hermina Street Starkweather Creek bridge, Cannonball Path extension, Badger-Rusk Path, East Rusk Path, Hammersley Road Path, Moorland Road Path, West Beltline Frontage Road Path, West Towne Path, and Woodward Drive Path projects will all improve non-motorized access to and through EJ areas in Madison. In Middleton, a new bike underpass of the Pheasant Branch bridge will close a gap in the low-stress bike network adjacent to identified EJ areas. These projects benefit the areas in which they are located or those nearby by improving non-motorized accessibility, strengthening the social fabric of the neighborhoods, and improving health by encouraging active transportation and recreation.

The City of Madison's Autumn Ridge Path includes a bicycle/pedestrian overpass of STH 30, a significant barrier to north/south travel by foot or by bike in the area between Stoughton Road/USH 51 and I-39/90; this facility will pass through or connect to multiple EJ Areas, directly enhancing access across STH 30 for 15,306 people¹⁰, most of whom live in EJ Areas. It will provide access to Walmart on the north side, and to the Milwaukee Street commercial area and provide a connection into the downtown on the south side. This project is funded through the STBG-U program.

The City of Madison is planning to extend the Beltline corridor/West Towne path from Gammon Road west to CTH M/S Pleasant View Road. The High Point Road segment crossing the Beltline was constructed in 2017 in conjunction with the S. High Point Bridge project. The segment from Gammon Road to the Grand Canyon Drive/Struck Street underpass was federally funded and constructed in 2020, including an underpass of Gammon Road. The segment from Gammon Road to S. High Point Road has been split into two phases, with the portion from High Point Road to Zor Shrine Place scheduled for construction in 2024 with Transportation Alternatives funding and the remaining segment awarded STBG-U funding for 2027-2028; the segment from Commerce Drive to S. Junction Road along Plaza Drive and Watts Road was awarded TAP funding by the MPO and was constructed in 2023. Once all phases are completed the project will provide a continuous east-west route serving the Greentree-Gammon Lane and Prairie Hills EJ Areas.

An extension of the Cannonball Trail from Catalpa Road north to Bowman Field will add a new multi-use path along the railroad corridor and then along Bowman Field. This will provide a connection to the Wingra path via Plaenert Drive. The path extension will provide a safe, direct connection from the Burr Oaks and Arboretum EJ Areas to downtown and the rest of the bikeway network, improving access for EJ Areas in South Madison. The Cannonball Trail includes overpasses of the Beltline and McKee Road just east of Verona Road. The Beltline overpass provides a safe, low stress crossing of the Beltline from the Arbor Hills EJ Area and other south side neighborhoods/EJ Areas and the City of Fitchburg into Madison. The Transportation-Alternatives-funded Badger-Rusk Path will provide a low-stress route to access the Beltline overpass in 2025, the construction of the East Rusk Path and the Moorland Road Shared-Use Path will be funded through Transportation Alternatives in 202, further improving non-motorized access for South Madison EJ areas.

The Troy Drive railroad underpass, long identified as a barrier for active transportation from EJ areas, will be rebuilt with a new railroad bridge providing adequate space for a safe and comfortable non-motorized facility under the railroad. Efforts to construct the planned Goodman Path in the northeast rail corridor have been stalled due to railroad corridor right-of-way issues. The planned path would connect to the Isthmus and Starkweather Creek (North Branch) paths and eventually provide an off-street bike route from the Swanton EJ Area directly into the downtown area. The first phase of another planned path connecting north Madison to the rest of the separated path network, the Woodward Drive Path, will be constructed with Transportation Alternatives funding in 2028. A new Hermina Street bicycle/pedestrian bridge over Starkweather Creek will improve accessibility for the Worthington Park neighborhood in 2025.

In Sun Prairie, the two federally-funded North Bird Street path projects will add a path and cycletrack on the bridge across USH 151, filling a critical gap in the low stress bike network serving the EJ area to the south, and continue the separated path to the north. Middleton and Dane County will construct a new bicycle underpass of CTH M at Branch Street, improving access for

¹⁰ Population of blocks with their centroid inside a 1-mile buffer of the new segments of the path (2010 Census) Middleton EJ areas. The Wisconsin Bike Federation has been awarded TAP funding for its Dane County Safe Routes to School

(SRTS) programs, which target schools with high proportions of students who qualify for free or reduced-price lunches, a proxy for EJ population.

In 2021 the MPO started to track metrics related to the impact of equity-related scoring to project selection for funding. Of the seven STBG-U and STBG-TA solicitations since tracking began, all requested projects were funded in three solicitations, and only four solicitations have required competitive scoring. In those four solicitations, the average percent of project scores resulting from equity points were higher for selected projects than for non-selected projects. As shown in the table below, this indicates that the MPO’s equity-related scoring metrics are having the desired impact of boosting scores for projects that serve EJ populations, making these projects more likely to be selected for funding.

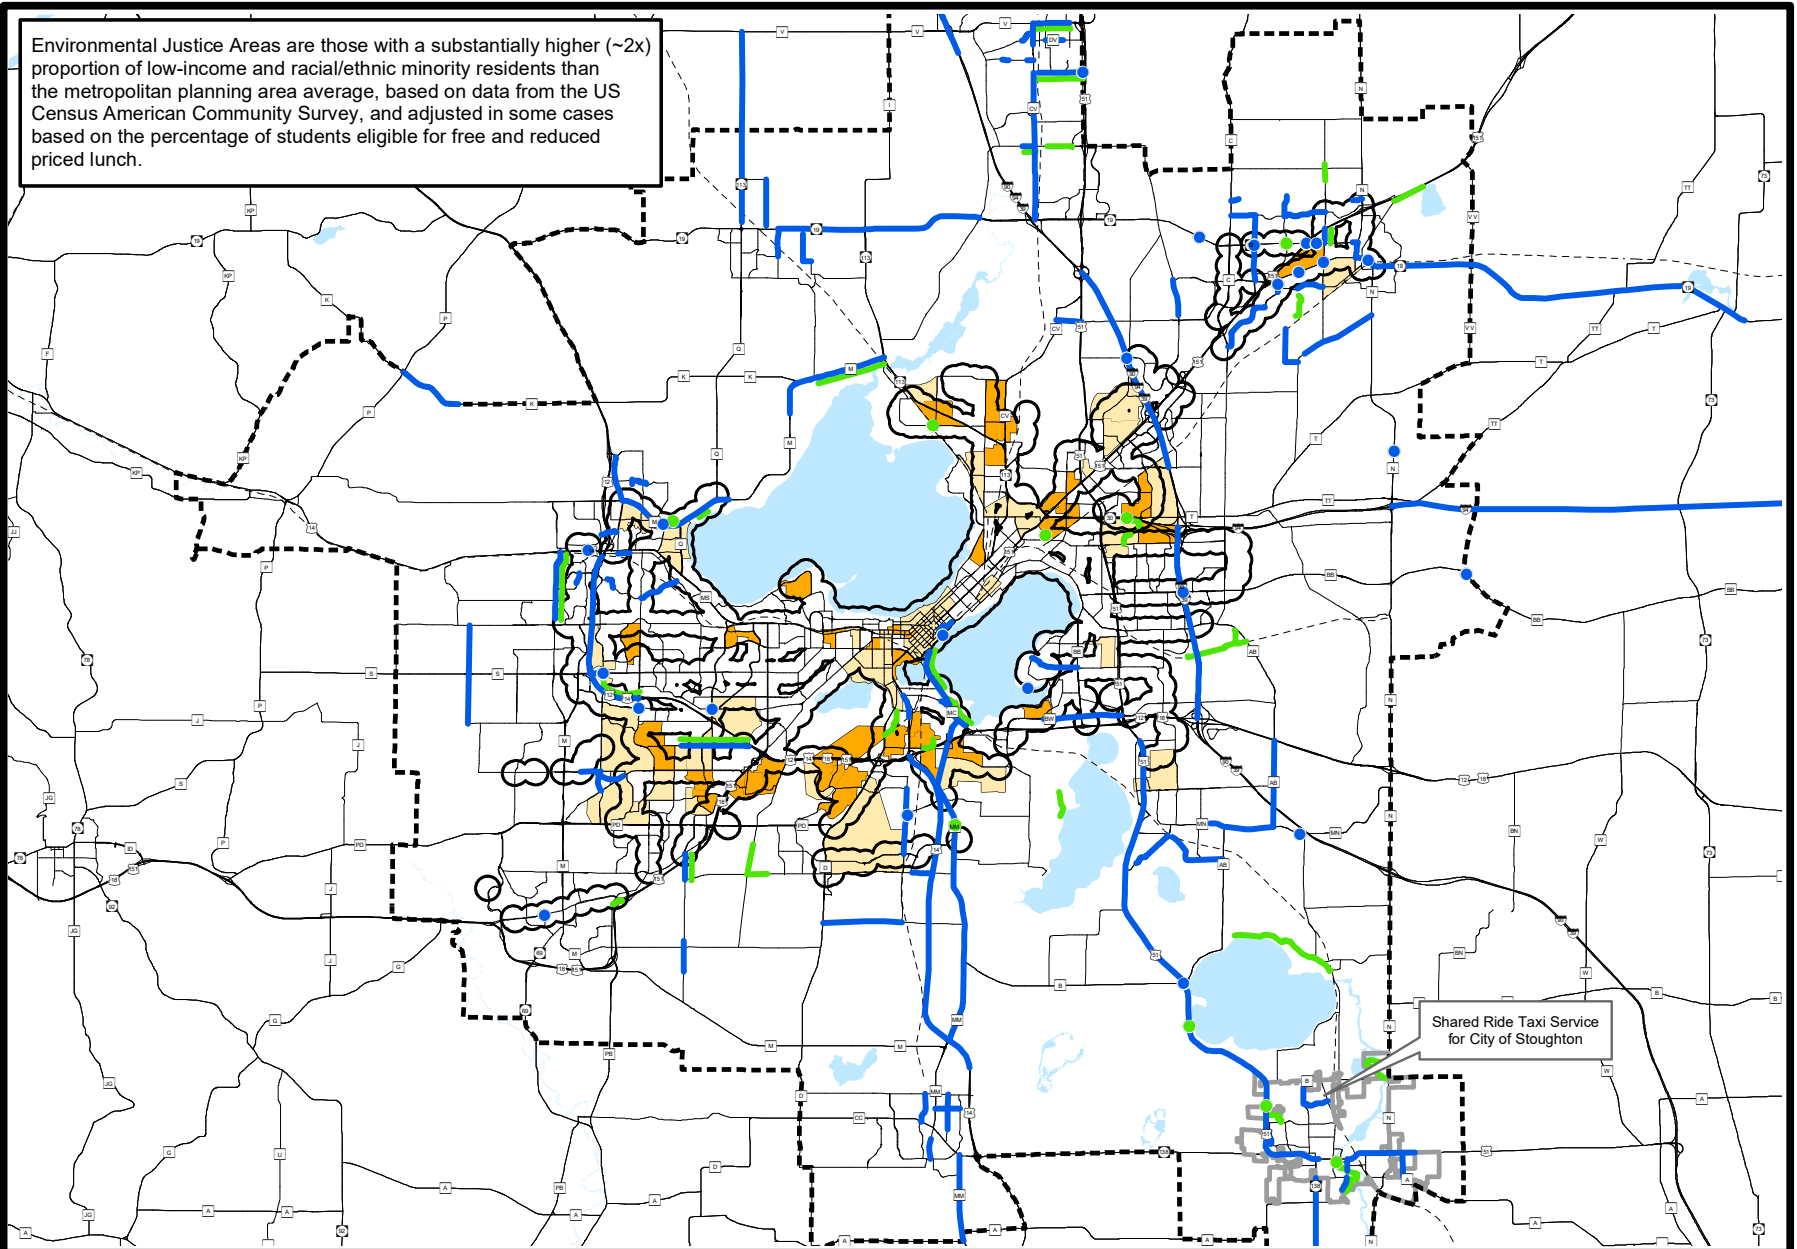

Program Cycle	Average % of Points from Equity - Selected Projects	Average % of Points from Equity - Non-Selected Projects	Notes
STBG-U 2021	9%	4%	
STBG-U 2022 Supplemental (Jan)	NA	NA	No new projects selected; additional funding to previously-selected projects
STBG-U 2022 Supplemental (Feb)	12%	3%	
STBG-TA 2022	16%	11%	
STBG-TA 2022 Supplemental Non-Infrastructure	7%	NA	Applications not scored – all selected for funding
STBG-TA 2022 Supplemental (Nov)	9%	NA	Applications not scored – all selected for funding
STBG-U 2023	9%	5%	
STBG-TA 2023 (June)	NA	NA	Applications not scored – all selected for funding

Conclusion

The major projects analysis shows that, taken in whole, the projects in the 2025-2029 TIP do not impose disproportionately high and adverse impacts on minority and/or low-income populations. Also, the benefits of the transportation improvements and services provided are reasonably distributed to serve the needs of all populations in the area.

It should be noted that the MPO’s EJ analysis for the TIP is just part of the efforts being made to address environmental justice. Implementing agencies also conduct EJ analyses as part of major studies and project development. For example, EJ analyses will be conducted as part of major corridor studies such as the USH 51/Stoughton Road and Beltline studies. In addition, further EJ analysis is done as federally funded projects move forward through the preliminary engineering/design and construction phases.

Environmental Justice Areas are those with a substantially higher (~2x) proportion of low-income and racial/ethnic minority residents than the metropolitan planning area average, based on data from the US Census American Community Survey, and adjusted in some cases based on the percentage of students eligible for free and reduced priced lunch.

Attachment E: Analysis of Anticipated Effect of TIP Toward Achieving Federal Performance Measure Targets

Introduction

Performance-Based Planning and Programming

The most recent three federal transportation bills, MAP-21, FAST ACT, and now Infrastructure Investment & Jobs Act (IIJA), require incorporation of performance-based planning and programming into the development of Metropolitan Planning Organization (MPO) Long-Range Regional Transportation Plans (LRTP) and Transportation Improvement Programs (TIP). The goals of the new performance management process are to make the most efficient use of federal transportation funds, refocus on national goals, increase accountability and transparency, and improve decision-making.

Federal performance measures have been established to track progress in achieving national goals, which include the following:

- **Safety** - To achieve a significant reduction in traffic fatalities and serious injuries on all public roads
- **Infrastructure Condition** - To maintain the highway infrastructure asset system in a state of good repair
- **Congestion Reduction** - To achieve a significant reduction in congestion on the National Highway System (NHS)
- **System Reliability** - To improve the efficiency of the surface transportation system
- **Freight Movement and Economic Vitality** - To improve the national freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development.
- **Environmental Sustainability** - To enhance the performance of the transportation system while protecting and enhancing the natural environment

The Greater Madison MPO (Metropolitan Planning Organization), the MPO for the Madison Metropolitan Area, has made significant progress in the transition to performance-based planning and programming. The MPO has tracked transportation system performance measures for many years and included its first official list of measures in its 2035 Regional Transportation Plan (RTP) Update adopted in 2012. The MPO also developed a list of congestion and reliability measures in its [Congestion Management Process](#) (CMP) adopted in 2011, and tracked those for which data was readily available. That CMP has now been replaced by an updated one with a scaled back list of measures that was included as part of the [Connect Greater Madison: 2050 Regional Transportation Plan](#), adopted in May 2022. The *Connect Greater Madison* Plan maintains the same core six goals from the previous RTP, which are consistent with the national goals above, and a revised set of performance measures tied to these goals. Based on both quantitative and qualitative analyses, the multi-modal set of recommended transportation facility and service investments in the *Connect Greater Madison* Plan were selected based on these goals and measures. These performance measures will also be used to track progress in achieving the goals over time. See Appendix B: System Performance Report in the plan.

The MPO began publishing an annual Performance Measures report in 2016 for 2015 baseline data to gauge progress in achieving the RTP goals and fulfill federal performance management requirements. A link to the 2020 report for 2019 data is at https://www.greatermadisonmpo.org/trends/documents/2019PMR_FinalWeb.pdf. The report for 2019 incorporates the federal measures along with numerous other regional measures tied to RTP 2050 goals. Due to the impacts of the COVID-19 pandemic in 2020, the MPO collected and reported required data for the federal performance measures, but did not produce a Performance Measures Report for 2020. The MPO transitioned to publishing an [online interactive performance measures dashboard](#) in 2023.

The MPO revised its set of project scoring criteria for the Surface Transportation Block Grant (STBG) – Urban program in 2023 (see Appendix A of the TIP) and for the Transportation Alternatives Program (TAP) in 2021 for use in evaluating and prioritizing projects for funding the MPO receives from those federal programs. Both sets of criteria rely heavily on quantitative scoring guidelines that are tied to RTP goals.

The performance measures established by FHWA and FTA were developed to measure the effectiveness of the following federal funding programs:

Federal Transportation Performance Measures	
Performance Measure Area	Performance Measures
FHWA Highway Safety Improvement Program (HSIP)	
Number of Fatalities and Serious Injuries	Number of Fatalities
	Number of Serious Injuries
	Number of Non-Motorized Fatalities and Non-Motorized Serious Injuries
Rate of Fatalities and Serious Injuries	Rate of Fatalities per 100 Million Vehicle Miles Travelled (MVMT)
	Rate of Serious Injuries per 100 Million Vehicle Miles Travelled (MVMT)
FHWA National Highway Performance (NHPP) and Surface Transportation Block Grant (STBG) Programs	
Condition of Pavements on the Interstate System	Percentage of Pavement of the Interstate System in Good Condition
	Percentage of Pavement on the Interstate System in Poor Condition
Condition of Pavements on the National Highway System (NHS) Excluding the Interstate	Percentage of Pavement of the Non-Interstate NHS System in Good Condition
	Percentage of Pavement of the Non-Interstate NHS System in Poor Condition
Condition of Bridges on the NHS	Percentage of NHS Bridges Classified as in Good Condition
	Percentage of NHS Bridges Classified as in Poor Condition
Performance of the Interstate System	Percentage of the Person-Miles Traveled on the Interstate that are Reliable
Performance of the NHS Excluding the Interstate	Percentage of the Person-Miles Traveled on the Non-Interstate NHS that are Reliable
FHWA National Highway Freight Program (NHFP)	
Freight Movement on the Interstate System	Truck Travel Time Reliability Index
FTA Section 53 Funding (5307, 5310, 5311, 5337, 5339)	
Transit Asset Management (TAM)	Percentage of Revenue Vehicles Exceeding Useful Life
	Percentage of Non-Revenue Service Vehicles Exceeding Useful Life
	Percentage of Facilities Exceeding the Transit Economic Requirements Model (TERM) Scale
	Percentage of Track Segments Having Performance Restrictions
Public Transportation Agency Safety Program (PTASP)	Number of Reportable Fatalities
	Rate of Reportable Fatalities Per Vehicle Revenue Miles
	Number of Reportable Injuries
	Rate of Reportable Injuries per Vehicle Revenue Miles
	Number of Reportable Safety Events
	Rate of Reportable Safety Events Per Vehicle Revenue Miles
	Mean Distance Between Major Mechanical Failures

Setting Targets for Performance Measures

Under the federally required performance management process, targets must be set for each of the federal performance measures. States must then report to the U.S. Department of Transportation (USDOT) on progress in achieving the targets on a schedule specific to each measure. At the state level, there are funding implications in cases where progress is not being made on a particular measure. State departments of transportation (DOTs) and transit agencies are to first set their performance measure targets in coordination with MPOs. In the case of DOT targets, MPOs may either choose to support the state targets or establish their own targets. In the case of the transit agency targets, MPOs may adopt the same targets or establish their own.

Given the limited amount of historical data for most of the measures, impact of COVID-19 on travel and uncertainty in what trends the data may show moving forward, and the limited amount of funding the MPO controls, the Greater Madison MPO has elected to support the state/transit agency targets for these measures, and to plan and program projects to contribute towards meeting these targets. The MPO adopted WisDOT’s 2025 safety targets on X_ 2024 as part of adopting the 2025-2029 TIP, in addition to also adopting WisDOT’s 2023 and 2025 targets for interstate pavement condition, non-interstate NHS pavement condition, bridge condition, Interstate Reliability, non-interstate NHS reliability, and freight reliability measures through Greater Madison MPO 2023 Resolution No. 4. While the MPO supports the state targets, the MPO reports annually the Madison Metropolitan Area or Dane County data for all of the federal measures and the prior year performance and overall trend as part of its annual Performance Measures monitoring process.

The MPO intends to continue to support the Metro Transit targets for transit asset management (TAM) and for the Public Transportation Agency Safety Plan (PTASP) since Metro is the agency with expertise to best manage its assets in light of funding challenges and addressing safety. The MPO adopted the 2023 TAM and PTASP targets in November 2022 through Greater Madison MPO 2022 Resolution No. 13 and again by 2024 Resolution No. 3 in April 2024 and will continue to adopt updated targets after Metro updates theirs. This TIP includes 2023 TAM performance; 2024 TAM targets will remain unchanged from 2023 targets.

Linkage of Investments to Performance Measures

The federal rules for metropolitan transportation planning require that the RTP and TIP shall include, to the maximum extent practicable, a description of the anticipated effect of the RTP and TIP toward achieving the federal transportation system performance measure (see 23 CFR 490) targets established, thereby linking investment priorities to those performance targets (23 CFR 450.326(d)).

The following section outlines the federal performance measures and current performance at the state and Madison Metropolitan Area/Dane County level, and then discusses how the projects programmed in the TIP and supporting regional transportation planning activities will assist in achieving the federal measure targets. It is anticipated that this analysis will evolve over time as methods are developed to better quantify the impacts of projects on the federal performance measures.

Federal Performance Measures and TIP Analysis

Safety

Performance Measures and Data

The safety measures and the WisDOT/MPO targets for 2025 are identified in the table below.

Performance Measure	2024 Target*	Dane County	
		2019-2023 Average	% Change from 2018-2022
Number of Fatalities	Reduce by 2% (600.8 or less)	34.4	-4.7%
Fatality Rate**	Reduce by 2% (.934 or less)	.682	-4.8%
Number of Serious Injuries	Reduce by 2% (3095.6 or less)	186.0	-5.4%
Serious Injury Rate**	Reduce by 2% (4.822 or less)	3.702	-5.5%
Number of Non-Motorized Fatalities and Serious Injuries	Reduce by 2% (379.4 or less)	39.4	-2.5%

* To be updated with 2025 Target when it becomes available.
 ** Per 100 Million Vehicle Miles Traveled

Highway Safety Improvement Program (HSIP) Project Prioritization

WisDOT evaluates potential HSIP projects by comparing the estimated crash reduction benefits expected from the project with the cost of that project. Crash reduction benefits are estimated by multiplying up to two crash modification factors (CMFs) by five years of observed crash data. CMFs and target crashes are identified by the Safety Analyst software and a spreadsheet tool developed by WisDOT to calculate the estimated crash reduction benefits. The projects approved for HSIP funding are reviewed and prioritized based on their ability to reduce crashes and their achievement of the goals of the State's Strategic Highway Safety Plan. WisDOT is responsible for all HSIP project programming.

HSIP Project Analysis

Nine (9) projects in the MPO Planning Area will receive Highway Safety Improvement Program (HSIP) funding, including:

- A new roundabout at STH 19 and Westmount Drive in Sun Prairie
- S. Syene Road Intersection Reconfiguration and Reconstruction
- Mineral Point Road and S. High Point Road intersection improvements
- S. Whitney Way and Odana Road intersection improvements
- Three intersection improvements along Main Street in Sun Prairie
- Vinburn Road and N. Towne Road Intersection improvements in DeForest
- CTH AB/Buckeye Road rail warning device in Madison
- USH 14 Deming Way Intersection- lengthen USH 14 west bound left turn lane and widen shoulders
- Install monotubes for signals and lighting at O'Keefe Avenue

Non-HSIP Projects

Safety is an important consideration in the scoping process of all projects included in the TIP. Resurfacing, recondition, and reconstruction projects can include elements that improve the safety performance of roadways, such as correcting geometric design deficiencies, improved pavement traction, improved traffic flow and improved pavement markings and signage. Pedestrian and bicycle infrastructure improvements help to separate vulnerable roadway users from automobile traffic. FHWA's [Crash Modification Factors \(CMF\) Clearinghouse](#) can provide a comprehensive overview of the potential safety benefit of any roadway improvement.

There are multiple other programmed roadway projects, which will improve safety through intersection improvements such as addition of turn lanes and signalization, addition of bike facilities, improved pedestrian crossings, and/or other safety enhancements.

The 2025-2029 TIP contains three federally funded pedestrian/bicycle education programs: Transportation Alternatives program funded Dane County Safe Routes to School (SRTS) program and separate City of Madison SRTS program and the STBG-Urban funded City of Madison Pedestrian & Bicycle Safety Education program. In addition to education, the City of Madison funds a Safe Routes to School infrastructure program.

Safe Streets Madison/Safe Streets for All Grant Projects— Safe Streets Madison is a locally funded project sponsored by the City of Madison with the goal of eliminating fatal crashes. Madison was also awarded planning and implementation grants through the Safe Streets and Roads for All program.

Planning Analysis

The MPO adopted a Regional Safety Action Plan (RSAP) in 2024, which incorporates the results work previously done by the UW TOPS Lab, including intersection safety screening and regional High Injury Network. The plan provides a strategic blueprint using a data-driven approach for creating a safer environment for all roadway users. It includes strategies such as prioritized infrastructure improvements, outreach and education campaigns, and policy changes aimed at reducing traffic-related fatalities and serious injuries. The MPO Policy Board officially adopted a goal of Zero roadway fatalities and serious injuries by 2040. The MPO also submitted a regional supplemental planning grant application through the Safe Streets and Roads for All program to help five local agencies develop supplemental safety plans, including active transportation plans and safe routes to school plans, to help further inform the RSAP.

The City of Madison completed a Vision Zero Action Plan, which includes multiple strategies and identifies safety projects. Project implementation has already begun, including reducing speed limits on arterial streets and improving pedestrian

crossing facilities at select intersections. The MPO awarded Transportation Alternatives program funding to the City of Sun Prairie to develop its own comprehensive Vision Zero Action Plan, which is currently under way.

The MPO is an active member of the Dane County TSC. The TSC meets quarterly to review traffic crash data in order to enhance the level of safety on all public roadways in Dane County for all roadway users. The TSC is comprised of representatives including planners and engineers, law enforcement, medical professionals and other interested community participants to foster a coordinated effort to promote the Safe System Approach. The MPO assists with compiling crash statistics and facilitating the crash incidence review.

Bridge Condition

Performance Measures and Conditions Data

The table below shows the current WisDOT/MPO targets and current conditions in the Madison Metro Area for NHS bridges in good and poor condition.

Performance Measure	2- Year Target (2023)	4-Year Target (2025)	Madison Metro Area (2022)
Percentage of NHS Bridges in Good Condition	>49%	> 48%	45%
Percentage of NHS Bridges in Poor Condition	< 3%	< 3%	<1%

Project Analysis

The 2025-2029 TIP contains 14 projects in the MPO planning area that will add, repair or replace bridges or bridge decks as part of their scope, including:

- Interstate 39/90 Milwaukee Street Bridge Rehabilitation
- John Nolen Drive (North Shore Drive to Olin Avenue) – Replace or Rehab eight bridges as part of Reconstruction project.
- USH 18/151 (CTH G to STH 69; Widen CTH G Bridge over USH 18/151, Widen USH 18/151 Bridges over Sugar River, and Widen Epic Lane on Ramp Bridge over USH 18/151
- West Road (Country View Road to Dairy Ridge Road) Construct new bridge over the Sugar River and Military Ridge State Trail
- CTH BB Koshkonong Creek Bridge Reconstruction
- CTH M Bridge Replacement over Pheasant Branch Creek
- CTH MN Door Creek Bridge Reconstruction

Pavement Condition

Performance Measures and Conditions Data

The table below shows the current WisDOT/MPO targets and percentage of Interstate and non-Interstate NHS lane-miles in good and poor condition. “Good condition” suggests no major investment is needed. “Poor condition” suggests major reconstruction investment is needed.

Performance Measure	2- and 4- Year (2023 and 2025) Target*	Madison Metro Area (2022)
Percentage of Interstate Pavement in Good Condition	> 60%	59%
Percentage of Interstate Pavement in Poor Condition	< 4%	1%

Percentage of Non-Interstate NHS Pavement in Good Condition	> 30%	23%
Percentage of Non-Interstate NHS Pavement in Poor Condition	< 10%	6%
* Two- and four-year targets are the same		

Project Analysis

The Madison MPO Planning Area (MPA) contains a total of 169 NHS Interstate Highway lane miles, 477 non-Interstate NHS US/State highway lane miles, and 254 local road/CTH NHS lane miles. The 2025-2029 TIP contains 37 projects that will be reconstructed (and in some cases expanded or extended) in the planning area, and 54 projects that will be resurfaced or reconditioned in the planning area.

Travel Time Reliability and Freight Movement

Performance Measures and Conditions Data

The table below shows the current WisDOT/MPO target level of travel time reliability for both the Interstate and non-Interstate NHS system.

Performance Measure	2- Year Target (2023)	4-Year Target (2025)	Madison Metro Area (2022)
Percentage of Person-Miles Traveled on the Interstate that are Reliable	92.5%	93%	100%
Percentage of Person-Miles Traveled on the Non-Interstate NHS that are Reliable	91%	89.5%	92%

The percent of person-miles traveled with unreliable travel times in the Madison Metro area on the non-Interstate NHS system exceeds the four-year target. Even still, the relatively high percentage of the Madison area system that meets the reliability measure is skewed by the 4-hour peak periods used for the federal measure. The AM and PM peak periods in Madison are 60 or 90 minutes at most.

The table below shows the existing WisDOT/MPO target truck travel time reliability index (on the Interstate system) targets.

Performance Measure	2- Year Target (2023)	4-Year Target (2025)	Madison Metro Area (2022)
Truck Travel Time Reliability Index	1.3	1.3	1.2

The 2022 data shows that the Madison Metro area currently meets the two-and four-year targets for freight travel time reliability on the Interstate system. An index of 1.2 indicates a high reliability of system performance. The Interstate typically only experiences heavy congestion and slower travel times on summer Friday nights and Sundays due to tourist traffic.

Project Analysis

Four projects comprising approximately 7.4 lane miles of roadway in the Madison Metropolitan Area will add travel lanes and therefore improve travel time reliability. The USH 51 expansion project in Stoughton and north of Stoughton is the most significant expansion project.

The 2025-2029 TIP contains 25 projects that will include a transportation systems management (TSM) component. The goal of these projects is to maximize the efficiency, safety, and utility of the transportation infrastructure. TSM considers the full range of options for maximizing the performance of existing transportation infrastructure without expanding the infrastructure itself (e.g., adding general purpose lanes, etc.). TSM strategies can include physical changes to the roadway, changes to how the roadway is used, and efforts aimed at reducing demand for use of the roadway (travel demand management). Most of the TSM projects listed in the 2025-2029 TIP are intended to increase vehicle throughput at intersections and reduce average delay along with improving safety.

The following are examples of TSM projects in the 2025-2029 TIP:

- USH 18/151 (CTH G to Verona Avenue) Add Auxiliary Lanes and CTH G ramp lanes
- USH 18/151 (Verona Avenue to STH 69) Add EB Ramp/Auxiliary lanes
- STH 19 (Westmount Drive Intersection) Construct Roundabout
- S. Syene Road/McCoy Road Intersection Reconfiguration and Reconstruction from W. Clayton Road to McCoy Road
- MPO TDM program (“RoundTrip”), which includes employer-based programs and an online transportation matching service that allows commuters to quickly find carpool partners, vanpool options, bike buddies, transit routes, and park and ride lots based on their specific circumstances.

Planning Activities

The MPO completed an update to its Congestion Management Process (CMP) in conjunction with the RTP Update. Part of the analysis for the update included purchase of StreetLight Analytics travel time data used to help identify bottlenecks that might be alleviated through lower cost intersection improvements and TSM strategies. StreetLight data will be used moving forward to assess the impacts of major TSM projects. The MPO will also be developing a Regional Transportation Systems Management and Operations Plan (TSMO) in 2025.

Transit Asset Management

Performance Measures and Conditions Data

Metro Transit completed and certified its initial Transit Asset Management (TAM) Plan in December 2018. The plan is considered a “living document” with reviews and revisions planned on an annual basis. The initial plan incorporated Metro’s initial 2019 TAM performance measure targets for the applicable measures, which relate to the different assets, including equipment (non-revenue vehicles), rolling stock (revenue vehicles), and facilities. 2020 TAM targets were adopted in 2019 in TPB Resolution 163, 2021 targets were adopted in MPO 2020 Resolution No. 5, and 2022 targets were adopted in MPO 2021 Resolution No. 12. The MPO adopted the 2023 TAM targets in November 2022 through Greater Madison MPO 2022 Resolution No. 13 and again by 2024 Resolution No. 3 in April 2024 and will continue to adopt updated targets after Metro updates theirs. This TIP includes 2023 TAM performance; 2024 TAM targets will remain unchanged from 2023 targets.

The table below shows the 2023 Metro/ MPO targets, 2023 performance, and 2020 baseline conditions for Metro Transit for the three TAM performance measures related to buses, non-revenue service vehicles, and facilities, which for purposes of the TAM plan are Metro’s bus maintenance facilities at 1 South Ingersoll (formerly 1101 E. Washington Avenue) and 3829/3901 Hanson Road.

Performance Measure	Baseline (2020)	Performance (2023)	Target (2023)
Percentage of Rolling Stock (Buses) that Have Met or Exceeded their Useful Life	14%	15%	11%
Percentage of Non-Revenue Service Vehicles that Have Met or Exceeded their Useful Life	55%	58%	38%
Percentage of Facilities with a Condition Rating Below 3.0 on the FTA Transit Economic Requirements Model (TERM) Scale.	100%	0%	0%
TERM rating for Ingersoll Street facility	2.0	3.7	4.0
TERM rating for Hanson Road facility	NA	3.8	4.0

For buses, a 2023 target was set of having 11% of Metro's inventory exceed the useful life benchmark (ULB) of 14 years. As of December 2023, 15% of Metro's bus fleet exceeded the ULB. Metro uses 14 years as the ULB rather than the federal minimum of 12 years because Metro uses the oldest buses for school and other peak period only service and as reserves, thus limiting the number of miles on buses as they age. ULB performance improved from 2020-'21 because fleet transition to include new 60' articulated buses involves disposing of five additional 40' buses each year. The bus replacement plan calls for the annual replacement of 15 buses based on age and condition. With BRT and the Route Redesign projects, a fleet analysis was conducted and Metro will require fewer 40' buses in the future so the inventory reduction process continued in 2023 with the disposal of 23 buses. The new bus delivery was delayed until 2024, so even with these disposals, the performance measure target was not met. The inventory will change dramatically later in 2024 as 62 fully electric 60' articulated buses will be delivered by September 2024.

Metro lengthened the ULB for non-revenue trucks from eight years to ten based on historic use and longevity of this vehicle type in 2022. Although two new vehicles were purchased in 2022, they were not delivered that year, and Metro did not meet their 38% of vehicles beyond their ULB target in 2022. Based on a 2023 inventory analysis, there will be at least two non-revenue vehicles replaced annually, which will aid in complying with the performance targets. The replacement of non-revenue vehicles occurred in 2023 with the addition of 16 vehicles and due to late deliveries, the four vehicles scheduled for disposal in 2023 were delayed until early 2024. The increase in vehicles was necessary due to the 2023 route redesign.

For TAM performance measure purposes, Metro's maintenance facilities are located at 1 South Ingersoll (formerly 1101 East Washington Avenue) and at 3829/3901 Hanson Road. Metro has adopted a TAM target of a TERM rating of 4, with 0% of facilities rated under 3. Facility TAM targets did not change in 2023, but the addition of the new Hanson Road facility and continued upgrades at the Ingersoll facility (formerly East Washington) improved Metro's performance to better than 3.0 (Adequate) on the TERM scale, although they do not yet meet the goal of 4.0 on the TERM scale. They will achieve this target once the ongoing work on both facilities is completed.

In 2020, the Metro facility at South Ingersoll (then their only facility) was rated 2.5. It had been rated 1.0 (Poor), but repairs and upgrades have recently been made, including roof repairs in 2018 and a new wash bay in 2019. Construction on phased upgrades continue, with the fall 2022 TERM rating at 3.6.

Project Analysis

Metro Transit has programmed funds to continue adhering to its current bus replacement schedule of 15 buses per year. If Metro had been able to maintain this schedule, the percentage of buses at or past their ULB would have met or dropped below the 11% target by 2021; however, Metro was not able to add new electric buses as scheduled in 2020 and retained a bus scheduled for disposal to use in the interim. Increasing the fleet size by retaining a vehicle past its ULB negatively affected this performance measure in 2020 and exacerbated the measure in 2021 as the entire fleet aged, but the 2022 bus replacement brought this measure under the 11% target to 8%. The fleet transition plan to prepare for BRT and the Network Redesign will result in reducing the number of older 40' buses, and replace them with 60' articulated buses, which will further reduce the percentage of the fleet beyond their ULB.

Metro's replacement plan for service vehicles is more flexible with funding allocated each year and a decision made annually on which vehicles to replace based on age, repair history, and any anticipated major repairs. It is less certain whether Metro will be able to meet its performance target for service vehicles based on the funding currently programmed. Due to the combined need to make facility repairs and the unexpected costs associated with the COVID-19 pandemic, these purchases did not take place in 2020.

Metro's maintenance facility at 1 South Ingersoll (formerly 1101 E. Washington Avenue) has been in need of major renovation. It is also over capacity, having been designed to serve 140 buses, but servicing as many as 220 buses in 2021. The facility has had no significant upgrades since it was built 40 years ago, until renovations began in 2018. Investment in the facility was delayed for years in anticipation of a relocation, but a full relocation of the facility is no longer being considered. Facility and functional issues included: inadequate ventilation, heating, and cooling; an open-air wash line creating air quality problems; needed upgrades to emergency egress lighting; confined number of work bays and poor space layout; and right-turn vs. desired left-turn circulation for buses.

A facility renovation plan was developed with the assistance of an engineering firm, Mead & Hunt, with improvements to be implemented in four phases starting in 2019 through 2025. Roof repairs were already made. Because of the need to use its federal formula funding for buses and capital maintenance, the facility renovation will be 100% locally funded.

Implementation of the programmed facility renovation plan will allow the facility to meet the federal performance measure target. An inventory and condition assessment completed in 2022 reflects the impact of ongoing repairs and upgrades on meeting the facility TAM performance target, with the TERM rating increasing from 1.0 to 2.0 in 2019, to 2.5 in 2020, to 3.6 in 2022, and 3.7 in 2023.

Public Transportation Agency Safety Plan

Performance Measures and Conditions Data

Metro Transit completed and certified its initial Public Transportation Agency Safety Plan (PTASP) in July 2020. The plan is considered a “living document” with reviews and revisions planned on an annual basis. The initial plan incorporated Metro’s initial 2020 PTASP performance measure targets for the applicable measures. The MPO adopted the same 2020 targets that Metro adopted in TPB Resolution No. 163, which remained unchanged in 2021, adopted in MPO 2020 Resolution No. 5. Metro updated its PTASP performance measure targets for 2022 in MPO 2021 Resolution No. 12. The MPO adopted the 2023 PTASP targets in November 2022 through Greater Madison MPO 2022 Resolution No. 13 and again by 2024 Resolution No. 3 in April 2024 and will continue to adopt updated targets after Metro updates theirs.

The Metro/MPO Safety Performance Targets for 2022 included reductions in the Bus Transit targets for Injuries and Safety Events, as well as modifying the way the System Reliability/State of Good Repair measurement is reported to improve consistency with other measures. The 2024 targets are shown in the table below, with actual 2023 performance. 2024 PTASP targets are unchanged from 2022 and 2023 targets. Future targets will be updated following FTA’s adoption of new performance measures consistent with the IJA/BIL. The new performance measures are: Collision Rate, Pedestrian Collision Rate, Vehicular Collision Rate, Transit Worker Fatality Rate, Transit Worker Injury Rate, Assaults on Transit Workers, and Rate of Assaults on Transit Workers. These additions are consistent with the Bipartisan Infrastructure Law’s increased focus on bus collisions and transit worker safety. Targets for these new measures must be based on the three-year rolling average for each of these measures; since 2023 is the first year in which this information was collected, targets cannot be set until data is available for 2024 and 2025. Additionally, BRT will have its own targets, as a separate mode of transit in addition to Bus Transit and Paratransit.

Transit Safety Performance Targets 2023 – Actual vs Target							
Mode of Service	Fatalities (total)	Fatalities (per 100,000 VRM)	Injuries (total)	Injuries (per 100,000 VRM)	Safety Events (total)	Safety Events (per 100,000 VRM)	System Reliability/ State of Good Repair (per 100,000 VRM)
Bus Transit Actual	0	0	7	.12	458	8.04	3.38
Bus Transit Targets	0	0	10	.15	300	5.91	4
Paratransit Actual	0	0	0	0	0	.00	0
Paratransit Targets	0	0	1	.15	20	3.07	1.82

*Fatalities = Any fatal accident involving a Metro Transit vehicle regardless of fault
 Injuries = Any occurrence resulting in a person transported from the bus via ambulance
 Safety Events = any accident, incident, or occurrence
 VRM = vehicle revenue miles
 System Reliability = VRM between on-road, mechanical failure*

In addition to updating safety-related performance measure targets, Metro’s 2022 PTASP Annual Review addressed new requirements included in the BIL/IJA.

As a result of these new requirements, Metro’s safety planning team, management team and the Teamsters Union Local No. 695 created a new safety committee composed of frontline employees and management. The new team is responsible for identifying, recommending, and analyzing the effectiveness of risk-based mitigations or strategies to reduce consequences identified in the agencies’ safety risk assessment.

Metro's safety coordinator developed safety training for Maintenance employees which includes the required topic of de-escalation. Metro already has a comprehensive new hire and refresher staff training program for its bus operators. De-escalation training was added to this program in November of 2021.

The FTA has updated the National Public Transportation Safety Plan to provide additional information on how agencies can meet the new requirement for safety performance targets. However, performance targets for a risk reduction program are required to be based on three-year rolling averages, so targets cannot be set until 2024 and 2025 data is available.

Due to supply change issues and problems with the new 2022 fleet, Metro had a large number of newer buses that had to sit waiting for parts and repairs, therefore they were running older buses on main routes at times, which contributed to the higher number of break downs that caused service interruptions. Metro added fifteen new buses to its fleet in 2022 and retired fifteen older buses. Continued fleet replacement in 2023 and 2024—in which 62 new buses were received—has reduced the System Reliability/State of Good Repair measure below the target, and it is anticipated that 2024 will see further improvements due to the influx of new vehicles in the fleet.

Project Analysis

Safety-related projects in the Transit Capital and Transit Operating categories include preventative maintenance of transit vehicles, which is fundamental to meeting the System Reliability target, and facility renovations at Metro's maintenance facility at 1 South Ingersoll (formerly 1101 E. Washington Avenue), which has been in need of major renovation. It is over capacity, having been designed to serve 140 buses, but servicing as many as 220 buses in recent years. Until 2019, the facility had no significant upgrades since it was built 40 years previously. Investment in the facility was delayed for years in anticipation of a relocation, but that is no longer anticipated. Prior to recent upgrades, facility and functional issues included: inadequate ventilation, heating, and cooling; an open-air wash line creating air quality problems; needed upgrades to emergency egress lighting; confined number of work bays and poor space layout; and right-turn vs. desired left-turn circulation for buses.

A facility renovation plan was developed with the assistance of an engineering firm, Mead & Hunt, with improvements to be implemented in 6 phases starting in 2019 through at least 2024. Because of the need to use its federal formula funding for buses and capital maintenance, the facility renovation will be 100% locally funded. Metro determined that final phases needed to be delayed due to funding needed to implement the planned east-west BRT route and other needs. Implementation of the programmed facility renovation plan will improve safety for Metro staff and will help Metro continue to meet or exceed the performance targets for Fatalities, Safety Events, and System Reliability; the performance targets for Injuries relate to riders of vehicles in service, and will not be impacted by safety improvements at the maintenance facility.

The renovation will have positive impacts on system reliability. Employees will be provided a better, more modern, and healthier place to work. A new, proper, environment will enable employees to be more productive without compromising their safety. This could improve the number of vehicles inspected on a daily basis which would improve the spare ratio and overall road failure rate.

The 3B phase includes the operations unit areas. The biggest impact will be new driver amenities, including a break room that is the proper size to accommodate all drivers, quiet spaces and rooms to rest, kitchen amenities, and new furniture. Well-rested drivers are safe drivers. The current environment for them is sub-optimal. Operations will have a larger dispatch office and supervisor amenities to improve their working environment. This will have positive impacts to service delivery and safety. A more organized and properly sized workspace will enable supervisors to work with a lower rate of error. If an operations supervisor makes a mistake, it often has an impact on service delivery. For example, when a supervisor takes a sick call from a driver but forgets to assign the work to a standby driver. That bus doesn't run or is heavily delayed which as a domino effect on the system with passenger overloads, potential safety issues with passengers or students waiting outdoors for a longer period of time, etc. A better work environment will reduce the likelihood of this type of mistake.

The federal 5307/5337/5339-funded annual bus purchases in this TIP will help reduce the age of the Metro transit revenue vehicle fleet and should result in a lower number of System Reliability/State of Good Repair incidents. The 2024 "Articulated bus safety equipment for VRU protection" project will provide feedback to both drivers and vulnerable road users (VRUs) outside the vehicles if there are potential conflicts between the bus and any VRUs, improving safety for VRUs.

**Attachment F: Summary of Public Comments
Received on the Draft 2025-2029 Transportation
Improvement Program (To be Added)**

Attachment G: Procedure for Preparing and Amending the Transportation Improvement Program

1. TIP Preparation

The TIP program is the annual effort to specify a coordinated, multi-modal transportation program that includes the full range of transportation improvements to be considered for implementation during the next five-year period. This coordinated listing is prepared as a cooperative staff effort by Wisconsin Department of Transportation (WisDOT), Dane County, and local implementing agencies and the staff of the Greater Madison Metropolitan Planning Organization (MPO), and is primarily based upon capital improvement programs and budgets.

Implementing agencies submit their listings of proposed projects to MPO staff to coordinate into a comprehensive listing of proposed major transportation improvements, with indications of project limits, type, cost, timing, etc. MPO staff meets with WisDOT Southwest Region, Dane County, and municipal staff to review any discrepancies in the project listings submitted by these agencies for inter-jurisdictional and Federal and/or state funded projects. This draft listing is subject to review by the MPO Technical Coordinating Committee (TCC), MPO Policy Board, and local units of government. A notice of the availability of the draft TIP is sent out to a list of stakeholders. Anticipated transit and specialized transportation projects are also sent to private transit operators for comment. A public hearing is held before the MPO Board one month before adoption. Comments received are provided a response by staff (A summary of the timetable and public review opportunities is shown in the Table in Attachment F).

Following action by the MPO Policy Board, this document is submitted to appropriate state and Federal agencies as an indication of transportation improvement projects anticipated to be undertaken in this area. By annually pursuing this procedure, an up-to-date program of transportation projects is ensured.

2. TIP Amendments

Revisions to the TIP often occur between the scheduled annual updates. There are two types of revisions: (1) administrative modifications; and (2) amendments. The definitions and procedures for each are outlined below:

Administrative modifications are minor revisions, including:

- Minor change (less than 5%) in project or project phase costs;
- Minor change in funding sources of programmed project(s); or
- Minor change to project or project phase initiation dates.

Provided such a revision does not necessitate redemonstration of fiscal constraint, the procedure for administrative modifications includes approval by the MPO Director who then sends a letter to appropriate FHWA/FTA, WisDOT Bureau of Planning, WisDOT SW Region, and project sponsor staff notifying them of the TIP modification, with a copy included in the TIP file.

Amendments are revisions to federally funded projects listed in the TIP that involve a major change, including:

- Addition of a project to the first four years of the TIP;
- Deletion of a project from the TIP or moving it out of the first four years of the TIP;
- Major change to the initiation date of a project or project phase; or
- Major change in the design concept or scope or limits of a project.

Amendments require provision for public review and comment, a resolution by the MPO Board, and submission to WisDOT and FHWA/FTA. Amendments also require a redemonstration of fiscal constraint. Amendments are categorized as minor or major with different procedures for each.

Minor amendments include:

- Addition or deletion¹¹ of system preservation projects (e.g., street resurfacing or reconstruction without additional travel lanes, replacement of buses) that do not involve a major capacity expansion, are not regionally significant, and do not exceed the cost threshold for major amendments outlined below;
- Substantial change in the design concept or scope or limits of a system preservation project such that the original project description is no longer reasonably accurate;
- Substantial change in funding for a project that impacts the funding for other projects within the first four years of the TIP, forcing any project out of the 4-year TIP window.¹²

The process for minor TIP amendments is to provide advance notice of the amendment action by including a listing of the project changes under the TIP amendment resolution agenda item for the upcoming MPO Policy Board meeting. An opportunity for public comment is provided prior to action by the board. The amendment is also reviewed with the MPO's technical committee prior to MPO Board action if the committee meeting schedules allow.

Major amendments include:

- Addition or deletion of a major capacity expansion project of a regionally significant project;
- Substantial change in the design concept or scope limits of a major capacity expansion project or regionally significant project such that the original project description is no longer reasonably accurate;
- Change in the funding of a project or project phase (including adding or deleting a project) exceeding 10% of total Federal funding programmed in the MPO Planning area for the calendar year or \$7 million, whichever is less;
- Addition or deletion of a project involving STP-Urban funding; and
- Change in the cost or implementation schedule of a project or project phase involving STP-Urban funding that impacts the funding available for or timing of other STP-Urban projects.

Major capacity expansion projects include:

- Construction of a new regional arterial or collector roadway on new alignment;
- Reconstruction of an existing regional arterial or collector roadway to provide additional general purpose travel lanes for a significant distance;
- Construction of new interchanges;
- Conversion of an expressway to a freeway; and
- Construction of fixed-guideway or other priority (rail, bus rapid transit, dedicated bus lanes) transit facilities.

Regionally significant projects include:

- Roadway capacity expansion projects on the designated regional arterial system;
- Transit projects involving a fixed-guideway or other priority transit facility; and
- Major projects directly serving a regional employment/activity center or an airport (e.g. new roadway construction).

The process for major amendments is to send out a notice to local officials and others included in the notice for the annual TIP update and post the notice on the MPO website. A minimum 15¹³ day public comment period will be provided and a public hearing held before the MPO Policy Board prior to adoption.

11 Addition or deletion includes moving federal project funding in or out of the four-year project window of the TIP.

12 The Greater Madison MPO prepares a five-year TIP, but the FHWA and FTA consider projects in the fifth year to be informational only.
